

CODE OF ORDINANCES OF THE VILLAGE OF MILLTOWN

PREFACE

Democracy is a government of laws. Good democracy requires not only good laws, but laws which are readily available in written form to all who are subject to them, to the public officials and police officers who must administer them and to the judges and attorneys who must interpret and apply them. It is for this reason that the Village Board of the Village of Milltown has adopted this Code of Ordinances. This Code represents the contribution of the Village Board to the democratic and efficient administration of the government and affairs of the Village of Milltown.

OPEN MEETING LAW GUIDE

General Requirements

1. Wisconsin's Open Meeting Law provides that all meetings of governmental bodies shall be open to all citizens at all times. Sec. 19.81(2), Wis. Stats.
2. Meetings of local governing bodies of their subunits must be held in places reasonable accessible to the public.
3. Meetings are open to all members of the public unless specifically provided otherwise by law.
4. When members of a governmental body gather in sufficient numbers to compose a quorum, that meeting is presumed to be convened for the purpose of conducting official business. Such a meeting is in violation of the Open meeting Law if proper notice was not given and the meeting is not open to the public. Sec 19.82(2), Wis. Stats.
5. The Open Meeting Law also applies when members of a governing body, or committee thereof, engage in business of that body and when the number of members present is potentially sufficient to determine the governing body's course of action regarding the proposal discussed [State vs. Showers, No. 85-471 (June 15, 1987)].

Public Notice

1. **WHO MUST RECEIVE NOTICE.** For any meeting, the presiding officer, or his/her designee, shall give notice to the official newspaper and to any other members of the news media who have filed a written request to receive such notices, or if neither exists, in a manner likely to give notice to the public. Notice must also be given as required by any other state statutes.
2. **CONSTRUCTION OF NOTICE.** The notice for the meeting shall include:
 - a. The time, date and place of the meeting, and
 - b. The subject matter of the meeting, including subject matter to be considered in closed session.

The governmental body may discuss and, if urgent, act upon matters which were not specifically referred to in the agenda where the agenda contains a general item, such as "miscellaneous business." Where the presiding officer has specific knowledge that matters may come before the body, they should be included on the agenda.

3. **TIME FOR NOTICE.** Notice must be given at least twenty-four (24) hours prior to the commencement of the meeting unless for good cause such notice is impossible or impractical, in which shorter notice may be given. In no case may notice be provided less than two (2) hours in advance of the meeting. Sec. 19.84(3), Wis. Stats.
4. **COMMITTEES AND SUBUNITS EXEMPTION TO NOTICE REQUIREMENT.** A legal constituted subunit of a parent government body may conduct a meeting during the recess of the governing body's meeting or immediately after that meeting. For this exemption to apply, the presiding officer must publicly announce the time, place and subject matter of the subunit's meeting in advance at the meeting of the governing body.

Procedure for Closed Session

1. Required notice must be given if the presiding officer or his/her designee knows that a closed session is being contemplated. Notice is required regardless of whether a majority of members will or will not support going into closed session at the meeting. Sec. 19.84(2), Wis. Stats.
2. After first meeting in open session, with proper notice, a motion made and recorded supported by majority vote, is required to close, with the vote of each member recorded in the minutes. Sec. 19.85(1), Wis. Stats.
3. If the motion to go into closed session is carried, the presiding officer shall announce to those present at the meeting (to be recorded in the minutes) the nature of the business to be considered in the closed session and the specific exemption(s) relied up in Sec. 19.85, Wis. Stats., under which the closed session is permitted.
4. Only matters contained in the presiding officer's announcement of the closed session may be considered during the closed session.
5. An open session, with adequate notice, must precede a closed session, even where it was decided at a prior open session to go into a closed session at a subsequent meeting.
6. A governmental body may vote to go into closed session at a properly convened open session, for a permitted purpose, where specific notice of intent to consider going into closed session was not included on the agenda at the time notice of the open session was given. However, such procedure requires that the presiding officer or his/her designee did not contemplate or have knowledge that any of the other members contemplated a closed session at the time notice of the agenda was given.

Specific Exemptions Allowing Closed Sessions

1. Sec. 19.85(1)(a), Wis. Stats., creates an exemption for governmental bodies deliberating after quasi-judicial trials or hearings. However, boards of review cannot rely on this exemption, for Sec. 70.47(2m), Wis. Stats., requires all board of review meetings to be held in open session.
2. Sec. 19.85(1)(b), Wis. Stat., is a limited exception to the Open Meeting Law allowing the use of a closed session when a governmental body is considering the demotion, dismissal, licensing, discipline or tenure of a public employee or a person licensed by a board or commission. This exception permits preliminary discussion and investigation without the necessity of providing actual notice to the individual involved. However, before any evidentiary hearing can be conducted or formal action taken, notice must be given to the person involved so that he or she can exercise his or her right to request an open session for those purposes.
3. Sec. 19.85(1) (c), Wis. Stats., sanctions the use of closed sessions where governmental bodies are considering employment, promotion, and compensation or performance evaluation of any public employee. Governmental bodies should exercise caution when considering performance to avoid discussing matters that are covered by Sec. 19.85(1)(b), Wis. Stats.
4. Sec. 19.85(1)(d), Wis. Stat., permits the use of closed sessions when applications for parole or probation are being considered or when crime detection or prevention strategy is to be discussed.
5. Sec 19.85(1)(e), Wis. Stats., allows closed sessions for the purpose of deliberating or negotiating the purchase of public properties, the investing of public funds, or the conducting of other specified public business, as long as competitive or bargaining reasons require a closed session. Under this exception, a governmental body could meet in closed session for the purpose of forming negotiation strategies; although the body must give notice that an open session will be

held for the purpose of taking a vote to convene in closed session for the purpose of discussing labor negotiation strategies.

6. Discussions by governmental bodies considering the financial, medical, social or personal histories or disciplinary data of specific persons which, if conducted in public, would have a “substantial adverse effect upon the reputation of any person referred to” may be held in closed session under Sec. 19.85(1)(f), Wis. Stats. However, this exemption is unavailable where Sec. 19.85(1)(b), Wis. Stats., is applicable.
7. Sec. 19.85(1)(g), Wis. Stats., allows a governmental body to confer with its legal counsel in closed session for the purpose of obtaining oral or written advice concerning strategy to be adopted by the body with respect to present and prospective litigation directly involving the governmental body.
8. Closed sessions may be utilized by governmental bodies to consider requests for confidential written advice from ethics boards under Sec. 19.85(1)(h), Wis. Stats.

Limitations on Closed Sessions

1. Sec. 19.85(2), Wis. Stats., makes it impermissible for a governmental body to reconvene in open session within twelve (12) hours after a closed session, unless public notice of the subsequent open session was given at the same time and in the same manner as was required for the original open session.
2. Final ratification or approval of a collective bargaining agreement is required to be in open session under Sec. 19.85(3), Wis. Stats. However, a governmental body can vote to preliminarily approve bargaining proposals in closed session, in order to reach a consensus, as long as final ratification occurs in open session.

Ballots, Votes and Records

1. Unless provided elsewhere by statute, no secret ballot may be utilized by a governmental body to determine any election or decision, except the election of the officers of such body. This narrow exception does not permit use of secret ballots to elect members of committees, officers, of the governmental units such as department heads, or fill vacancies on the body itself.
2. Any member may require the ascertainment and recording of each vote.
3. Records of motions and roll-call votes must be preserved and open for public inspection.

Use of Equipment in Meetings

1. A governmental unit must make a reasonable effort to accommodate the media's equipment.
2. Any person may record, film or photograph a meeting in open session, provided that the use of this equipment does not interfere with the conduct of the meeting(s).
3. A member of a governmental body does not have the right to tape record a closed session of the board.

INDEX TO CODE

(References are to section numbers)

USE OF INDEX: This index is designed for user ease. To locate information found in the code, formulate a specific question. The key words in that question then become guides for using the index. In the event you do not locate the desired information on your first attempt, the following checklist may help.

- (1) Cross references (when needed) are always located at the beginning of entries. Have you overlooked any?
- (2) Frequently initial questions are too general. Reformulating a more specific question may help.
- (3) Information on officials can be found two ways. The entry for an official's name contains general duties as well as conditions of his office, such as compensation and tenure. Duties assigned to him by ordinances on specific subjects will be found under those subjects.
- (4) Definitions can be located under the "DEFINITIONS" main heading or in specific subject areas through the subheading "Definitions of terms."

SEC. 1-1-2 PRINCIPLES OF CONSTRUCTION.

The following rules or meanings shall be applied in the construction and interpretation of ordinances codified in the Code of Ordinances unless such application would be clearly inconsistent with the plain meaning or intent of the ordinances:

- (a) **Acts by Agents.** When an ordinance requires an act be done by a person which may be legally performed by an authorized agent of that principal person, the requirement shall be construed to include all acts performed by such agents.
- (b) **Code and Code of ordinances.** The words, "Codes," "Code of Ordinances" and "Municipal Code" when used in any section of the Code shall refer to this Code of Ordinances of the Village of Milltown unless the context of the section clearly indicates otherwise.
- (c) **Computation of Time.** In computing any period of time prescribed or allowed by these Ordinances, the day of the act or event from which the period of time begins to run shall not be included, but the last day of the period shall be included unless it is a Saturday, a Sunday or a legal holiday. If the period of time prescribed or allowed is less than seven (7) days, Saturday, Sundays, and legal holidays shall be excluded in the computation. As used in this section, "legal holiday" means any statewide legal holiday specified by state law.
- (d) **Fine.** The term "fine" shall be the equivalent of the word "forfeiture," and vice versa.

- (g) **Joint Authority.** All words purporting to give a joint authority to three (3) or more village officers or employees shall be construed as giving such authority to a majority of such officers or other person.
- (h) **Officers.** The term “officers” shall refer solely to local offices created by state statute.
- (i) **Officials.** The term “officials” shall mean all village officers and employees.
- (j) **Person.** The word “person” shall mean any of the following entities: natural persons, corporations, partnerships, associations, bodies politic or any other entity of any kind which is capable of being sued.
- (k) **Repeal.** When any ordinance having the effect of repealing a prior ordinance is itself repealed, such repeal shall not be construed to revive the prior ordinance or any part thereof, unless expressly so provided.
- (l) **Singular and Plural.** Every word in these ordinances referring to the singular number only shall also be construed to apply to several persons or things and every word in these ordinances referring to a plural number shall also be construed to apply to one (1) person or thing.
- (m) **Tense.** The use of any verb in the present tense shall not preclude the interpretation of the verb in the future tense where appropriate.
- (n) **Wisconsin Statutes.** The term “Wisconsin Statutes” and its abbreviation as “Wis. Stats.” Shall mean, in these ordinances, the Wisconsin Statutes for the year 1987-88, as amended from time to time.

A request may be made orally, but a request must be in writing before an action to enforce the request is commenced under Sec. 19.37, Wis. Stats. Except as provided below, no request may be refused because the person making the request is unwilling to be identified or to state the purpose of the request. No request may be refused because the request is received by mail, unless prepayment of a fee is required under Section 3-3-4(f)(6). A requester may be required to show acceptable identification whenever the requested record is kept at a private residence or whenever security reasons or federal law or regulations so require.
- (b) Each custodian, upon request for any record, shall, as soon as practicable and without delay, either fill the request or notify the requester of the authority's determination to deny the request in whole or in part and the reasons therefor. If a written request is denied in whole or in part, the requester shall receive a written statement of the reasons for denying the request. Every written denial of a request shall inform the requester that, if the request for the record was made in writing, then the determination is subject to review upon petition for a writ of mandamus under Sec. 19.37(1), Wis. Stats., or upon application to the attorney general or a district attorney.

- (c) In responding to a request for inspection or copying of a record which is not specifically exempt from disclosure, the legal custodian, after conferring with the Village Attorney, may deny the request, in whole or in part, only if he or she determines that the harm to the public interest resulting from disclosure would outweigh the public interest in full access to the requested record. Examples of matters for which disclosure may be refused include, but are not limited to, the following:

The custodian shall confer with the Village Attorney prior to releasing any such record and shall follow the guidance of the Village Attorney when separating out the exempt material. If, in the judgment of the custodian and the Village Attorney, there is no feasible way to separate the exempt material from the nonexempt material without unreasonably jeopardizing nondisclosure of the exempt material, the entire record shall be withheld from disclosure.
- (e) Whenever the Assessor, in the performance of the Assessor's duties, requests or obtains income and expense information pursuant to Sec. 70.47(7)(af), Wis. Stats., or any successor statute thereto, then such income and expense information that is provided to the Assessor shall be held by the Assessor on a confidential basis, except, however, that the information may be revealed to and used by persons: in the discharging of duties imposed by law; in the discharge of duties imposed by office including, but not limited to, use by the Assessor in performance of official duties of the Assessor's office and use by the Board of Review in performance of its official duties; or pursuant to order of a court. SEC. 6-3-1 DRIVEWAY PERMIT REQUIRED.

- (a) **Purpose.** For the safety of the general public, the Village of Milltown shall determine the location, size, construction and number of access points to public roadways within the Village limits. It is the Village's intent to provide safe access to properties abutting public roadways suitable for the property to be developed to its highest and best use, provided that access is not deficient or dangerous to the general public.
- (b) **Permit Required to Construct, Reconstruct, Alter or Enlarge.** No person, firm or corporation shall construct, reconstruct, alter or enlarge any private driveway within the limits of the dedicated portion of any public street under the control and jurisdiction of the Village of Milltown without first obtaining a sidewalk permit therefor as provided by this Chapter. A sidewalk permit is not required when a new sidewalk is to be constructed in conjunction with the construction of a new principal structure; the sidewalk is included in the building permit process in such cases.
- (c) **Application.** Application for such permit shall be made to the Village Clerk-Treasurer on a form provided by the Village and shall be accompanied by a drawing accurately depicting the portion of the proposed private driveway to be constructed, reconstructed, altered, or enlarged lying within the dedicated portion of the public street, the dimensions thereof and a statement of the materials proposed to be used. There is no fee for a driveway permit. Upon receipt of the application and the fee if required, unless the proposed private driveway is a part of construction for a building or other structure for which a building permit has been applied for, in which case no additional fee is required, the Village Clerk-Treasurer shall approve such application if the proposed driveway complies with the terms and conditions of this and other applicable Village ordinance.
- (d) **Application provision.** All driveway permit applications shall contain the applicant's statement that:
 - (1) The applicant represents all parties in interest, and that such proposed driveway is for the bona fide purpose of securing access to his property and not for the purpose of parking or servicing vehicles, advertising, storage or merchandising of goods within the dedicated portion of the Village Street, or for any other purpose.
 - (2) The Village, notwithstanding the construction of such driveway, reserves the right to make any changes, additions, repairs or relocations within the dedicated portion of the Village Street at any time, including relocation, reconstruction, widening and maintaining the street without compensating the owner of such private driveway for the damage or destruction of such private road.
 - (3) The permittee, his successors or assigns, agrees to indemnify and hold harmless the Village of Milltown, its officials, officers, agents or employees, against any claim or any cause of action for personal injury or property damage sustained by reason of the exercise of such permit.
 - (4) The Village does not assume any responsibility for the removal or clearance of snow, ice or sleet or the opening of any windrows of such material upon such portion of such driveway within the dedicated portion of the Village Street.

SEC. 6-3-2 DRIVEWAY LOCATION, DESIGN AND CONSTRUCTION REQUIREMENTS.

(a) **General Requirements.** The location, design and construction of driveways shall be in accordance with the following:

- (1) General Design. Private driveways shall be of such width and so location that all of such driveways and their appurtenances are within the limits of the frontage abutting the street of the property served. Driveways shall not provide direct ingress or egress to or from any street intersection area and shall not encroach upon or occupy areas of the street right-of-way required for effective traffic control or for street signs or signals. A driveway shall be so located and constructed that vehicle approaching or using it shall have adequate sight distance along the street. Driveway approaches shall be at least ten (10) feet apart except by special permission from the Village Board, and driveways shall in all cases be placed wherever possible as not to interfere with utilities in place.
- (2) Number. The number of driveways to serve an individual property fronting on a street shall be one (1), except where deemed necessary and feasible by the Village Board for reasonable and adequate service to the property, considering the safety, convenience and utility of the street.
- (3) Island area. The island area in the street right-of-way between successive driveways or adjoining a driveway and between the highway shoulder and right-of-way shall constitute a restricted area and may be filled in and graded only as provided in Subsection (7).
- (4) Drainage. The surface of the driveway connecting with rural type street cross sections shall slope downward and away from the highway shoulder a sufficient distance to preclude ordinary surface water drainage flowing onto the street roadbed.
- (5) Culverts. Driveways shall not obstruct or impair drainage in street ditches or roadside areas. Driveway culverts, where required, shall be adequate for surface water drainage along the street and shall not be less than the equivalent of a twelve-inch (12) diameter pipe. The distance between culverts under successive driveways shall not be less than ten (10) feet except as such restricted area is permitted to be filled in pursuant to the provisions of Subsection (7) hereof. Culverts shall be paid for by the property owner.
- (6) Reconstruction of Sidewalks and Curb and Gutter. When the construction of a driveway required the removal of a curb or gutter the new connections shall be of equivalent acceptable material and curb returns shall be provided or restored in a neat, workmanlike manner. The driveway surface shall be connected with the highway pavement and the sidewalk, if any, in a neat, workmanlike manner. The driveway construction shall include the replacement of such sidewalk areas which are inadequate or which are or may be damaged by means of vehicle travel across the sidewalk.
- (7) Restricted Areas. The restricted area between successive driveways may be filled in and graded only when the following requirements are complied with:
 - a. The filling or draining shall be to grades approved by the Village and, except where highway drainage is by means of curb and gutter, water drainage of the area shall be directed away from the street roadbed in a suitable manner.
 - b. Culvert extensions under the restricted area shall be of the same size and of equivalent acceptable material as the culvert under the driveway. Intermediate manholes adequate for cleanout purposes may be required where the total culvert length is excessive.
 - c. Where no street side ditch separates the restricted area from the street roadbed, permanent provision may be required to separate the area from the street roadbed to prevent its use for driveway or parking purposes by construction of a border, curb, rail or posts as may be required by the Village Board.

- (8) Relocation of Utilities. Any costs of relocating public utilities shall be the responsibility of the property owner with approval of the Village Board or authorized committee thereof necessary before any utility may be relocated and the driveway installed.
- (9) Construction Across Sidewalks. All driveway entrances and approaches which are constructed across sidewalks shall be of concrete constructed in accordance with the requirements for sidewalk construction in Section 6-2-2 of this Code insofar as such requirements are applicable, including thickness requirements.
- (10) Variances. Any of the above requirements may be varied by the Village Board in such instances where the peculiar nature of the property or the design of the street may make the rigid adherence to the above requirements impossible or impractical.
- (b) **Special Requirements for Commercial and Industrial Driveways**. The following regulations are applicable to driveways serving commercial or industrial establishments:
 - (1) Width of Drive. No part of a private driveway located within the dedicated area of a public street shall, except as hereinafter provided, have a width greater than thirty (30) feet measured at right angles to the center line of said driveway, except as increased by permissible radii. In instances where the nature of the commercial or industrial activity or the physical characteristics of the land would require a driveway of greater width than herein specified, the Village Board in its discretion may permit a driveway of additional width.
 - (2) Angular Placement of Driveway. The angle between the center line of the driveway and the curb line shall not be less than forty-five degrees (45).
 - (3) Island Areas. Where the public sidewalk is adjacent to the curb, an island of a minimum length of six (6) feet measured along the curb line shall be placed between each entrance to a Village Street. The curb shall be left intact for the length of this island. Where the public sidewalk is remote from the curb, an island of a minimum length of ten (10) feet measured along the right-of-way line shall be maintained along each entrance to the Village Street. All flares shall be tangent to the curb line. A curb length of not less than three (3) feet shall be left undisturbed adjacent to each property line to serve as an island area in the event an adjoining property owner applies for a driveway permit to serve his property.
- (c) **Special Requirements for Residential Driveways**. The following regulations are applicable to driveways serving residential property:

Such notice shall describe the nuisance and recommend procedures for its abatement, and shall further state that unless the owner shall abate the nuisance in the manner specified in the notice, or shall appear at the hearing to show that such nuisance does not exist or does not endanger the health of trees in the Village, the Forester shall cause the abatement thereof at the expense of the property served. The Village Clerk-Treasurer shall also deliver to the owner, at the time of issuance of the license, a tag of durable material bearing the same serial number as the license, the name of the county in which issued and the license year.
- (4) The owner shall securely attach the tag to a collar and the collar with the tag attached shall be kept on the dog for which the license is issued at all times, except as proved in Section 7-1-2(e).

- (3) The owner or keeper of a kennel shall keep at all times a kennel license tag attached to the collar of each dog over five (5) months old kept by the owner or keeper under a kennel license but this requirement does not apply to a show dog during competition, to a dog securely confined indoors or to a dog securely confined in a fenced area. These tags may be transferred from one dog to another within the kennel whenever any dog is removed from the kennel. - (g) **Public Nuisance Defined – Abatement After Notice.**
- (1) The growth of a natural lawn as defined in this Section shall be considered a public nuisance unless a Natural Lawn management Plan has been filed and approved and a permit is issued by the Village as set forth in this Section. Violators shall be served with a notice of public nuisance by certified mail to the last-known mailing address of the property owner.
- (2) If the person so served with a notice of public nuisance violation does not abate the nuisance within ten (10) days, the Enforcement Officer may proceed to abate such nuisance, keeping an account of the expense of the abatement, and such expense shall be charged to and paid by such property owner. Notice of the bill for abatement of the public nuisance shall be mailed to the owner of the premises and shall be payable within ten (10) calendar days from receipt thereof. Within sixty (60) days after such costs and expenses are incurred and remain unpaid, the Village Clerk-Treasurer shall enter those charges onto the tax roll as a special tax as provided by State statute.
- (3) The failure of the Village Clerk-Treasurer to record such claim or to mail such notice or the failure of the owner to receive such notice shall not affect the right to place the Village expense on the tax rolls for unpaid bills for abating the public nuisance as provided for in this Section.
- (h) **Penalty.**
- (1) Any person, firm or corporation which does not abate the nuisance within the required time period or who otherwise violates the provisions of this Section shall be subject to the general penalty found in Section 1-1-6.
- (2) In addition to any penalties herein provided, the Village may issue stop work orders upon owners of lots where work is unfinished under a previously issued building permit for any violation of this Section.

SEC. 8-1-7 REGULATION OF LENGTH OF LAWN AND GRASSES.

- (a) **Purpose.** This Section is adopted due to the unique nature of the problems associated with lawns, grasses and noxious weeds being allowed to grow to excessive length in the Village of Milltown.
- (b) **Public Nuisance Declared.** The Village Board finds that lawns, grasses and noxious weeds on lots of parcels of land which exceed eight (8) inches in length adversely affect the public health and safety of the public in that they tend to emit pollen and other discomforting bits of plants, constitute a fire hazard and a safety hazard in that debris can be hidden in the grass, interferes with the public convenience and adversely affects property values of other land within the Village. For that reason, any lawn, grass or weed on a lot or other parcel of land which exceeds eight (8) inches in length is hereby declared to be a public nuisance, except for property located in a designated floodplain area and/or wetland area or where the lawn, grass or weed is part of a natural law approved pursuant to Section 8-1-6 above.
- (c) **Nuisances Prohibited.** No person, firm or corporation shall permit any public nuisance as defined in Subsection (b) above to remain on any premises owned or controlled by him within the Village.
- (d) **Inspection.** The Weed Commissioner or his designee shall inspect or cause to be inspected all premises and places within the Village to determine whether any public nuisance as defined in Subsection (b) above exists.
- (e) **Abatement of Nuisance.**
 - (1) If the Weed Commissioner shall determine with reasonable certainty that any public nuisance as defined in Subsection (b) above exists, he shall immediately cause written notice to be served that the Village proposes to have the lot grass or lawn cut so as to conform with this Section and Section 8-1-5.
 - (2) The notice shall be served at least five (5) days prior to the date of the hearing and shall be mailed or served on the owner of the lot or parcel of land or, if he is not known and there is a tenant occupying the property, then to the tenant, of the time and place at which the hearing will be held.
- (f) **Due Process Hearing.** If the owner believes that his grasses or weeds are not a nuisance, he may request a hearing before the Village Board. The request for said hearing must be made in writing to the Village Clerk-Treasurer's office within the five (5) days set forth in the Weed Commissioner's notice. Upon application for the hearing, the property owner must deposit a \$25.00 bond. If a decision is rendered in the property owner's favor, the \$25.00 will be returned to the property owner. If the property owner fails to appear for the hearing or if the decision is rendered against the property owner, the deposit shall be forfeited and applied to the cost of Village personnel abating the nuisance, if necessary. When a hearing is requested by the owner of the property, a hearing by the Village Board shall be held within seven (7) days from the date of the owner's request. The property in question will not be mowed by the Village until such time as the hearing is held by the Board. At the hearing, the owner may appear in person or by his attorney, may present witnesses in his own behalf and may cross-examine witnesses presented by the Village as well as subpoena witnesses for his own case. At the close of the hearing, the Village Board shall make its determination in writing specifying its findings, facts, and conclusions. If the Village Board determines that a public nuisance did exist, the Board shall order the Weed Commissioner to mow the property in question unless the property has been mowed by the owner within forty-eight (48) hours of the Village Board's decision. If the owner does not abate the nuisance within the described 48 hours, the Weed Commissioner shall cause the same nuisance to be abated and cost in excess of the forfeited fee assessed accordingly.

- (g) **Village's Option to Abate Nuisance.** In any case where the owner, occupant or person in charge of the property shall fail to cut his lawn, grass or weeds as set forth above, then, and in that event, the Village may elect to cut said lawn, grass or weeds as follows:
- (1) The written notice required in Subsection (e) shall inform said person that in the event of his failure to abate the nuisance within the prescribed time, the Village shall abate the same and the cost thereof shall be assessed to the property owner as a special charge.
 - (2) The Village shall cut or cause to be cut all grass and weeds from the subject's property and shall charge the expenses of so doing at a rate as established by resolution by the Village Board. The charges shall be set forth in a statement to the owner, occupant or person in charge of the subject premises. If said statement is not paid in full within thirty (30) days thereafter, the Village Clerk-Treasurer shall enter the charges in the tax roll as a special tax against said lot or parcel of land, and the same shall be collected in all respects like other taxes upon real estate, or as provided under Sec. 66.615(3)(f), Wisconsin Statutes.

SEC. 8-1-8 COMPULSORY CONNECTION TO SEWER AND WATER.

- (a) To assure preservation of public health, comfort and safety, it shall be the duty of the owner or the agent of the owner of any building used for human habitation and located adjacent to a sewer or water main, or in a block through which one (1) or both of such systems extend to connect therewith after notice as provided herein.
- (b) When a sewer or water main becomes available to any building used for habitation, the Village Board shall notify in writing the owner or his agent to connect therewith and to install a water closet and such other facilities as may be reasonably necessary to protect the public health, welfare and safety. The manner of connecting shall be prescribed by the Building Inspector.
- (c) The notice required by this Section shall be given in the manner prescribed by Sec. 262.06(1), Wis. Stats., or by registered mail addressed to the last-known address of the owner or his agent.
- (d) If the owner or his agent fails to comply after ten (10) days' notice as herein provided, the Village may cause connection and installations to be made and the expense thereof assessed as a special tax against the property.
- (e) The owner or his agent may, within thirty (30) days after completion of the work, file a written option with the Village Clerk-Treasurer electing to pay the special tax in five (5) equal annual installments with interest as established by the Village Board.
- (f) After connection of any building used for human habitation to a sewer main, no privy, cesspool or waterless toilet shall be used in connection therewith.

- (1) Increasing production and consumption rates, continuing technological development and energy requirements have led to the generation and use of greater quantities of hazardous materials and associated hazardous waste;
- (2) The problems of disposing of hazardous waste are increasing as a result of air and water pollution controls and a shortage of available landfill sites;
- (3) While it is technologically and financially feasible for hazardous waste generators to dispose of their waste in a manner which has a less adverse impact on the environments than current practices, such knowledge is not being utilized to the extent possible;
- (4) Even though the Village of Milltown is not heavily industrialized, there is significant daily hazardous waste disposal problems; and
- (5) The public health and safety and the environment are threatened where hazardous materials and wastes are not managed in an environmentally sound manner.

Such wastes include, but are not limited to those which are toxic, carcinogenic, flammable, irritants, strong sensitizers or which generate pressure through

- (g) **Public Protection.** Should any prohibited discharge occur that reasonably causes a threat to the life, safety or health of the public, the senior fire officer on the scene may order an evacuation of the area or take other appropriate protective steps for a period of time as deemed necessary for the safety of the public.

The owner shall either shovel out an area behind the curb in which to place his wastes or he shall place it in his driveway. Collection crews will not collect residential solid waste unless it is placed at the curb of a public right-of-way for collection. Should collection crews be unable to discharge contents of garbage cans into collection vehicles using normal handling procedures, the cans, including contents, will be left at curb side. The owner shall make provisions to assure that the solid waste therein can be collected on the next collections day. Collection crews will not empty garbage cans by means other than dumping.

- (2) No garbage containers or other containers for refuse other than those of the Village shall be placed, kept, stored or located within the right-of-way of a street or alley; provided, however, that the Village Board may authorize the location off such containers within the public right-of-way at specified places and times when such location is necessary for the expeditious collection and disposition of refuse.
 - (3) The Village shall collect regular refuse on Tuesdays or at some other designated time if the collection day falls on a holiday. At the request of the property owner or tenant and upon payment of a special collection fee, special collections may be made for appliances, tires and other bulky items. There shall only be a charge for regular collection service for those areas not served by municipal sewer.
- (b) **Restriction on Time of Placement.** All receptacles and containers for refuse and rubbish and all bundles of rubbish shall be placed in collection locations as designated in Subsection (a) above only after 6:00 p.m. on the evenings prior to the regular collection time the following day. Village employees or employees of licensed collectors will not enter any structures to remove garbage or refuse, except by written agreement with the property owner.
 - (c) **Recyclable Waste.** All recyclable waste must be separated from other refuse for pickup by the Village of Milltown or its licensed collectors. "Recyclable Waste" is defined in Section 8-3-3(q) of this Chapter as: "Waste material that can be remanufactured into usable products and shall include, by way of enumeration but not by way of limitation, glass, plastics, newspapers, cardboard, metals (aluminum, steel, tin, brass, etc.)". Recyclable waste is to be placed in paper bags or containers and will be picked up on the second and fourth Mondays of each month. All other provisions of this Chapter pertaining to refuse (container standards, placement and transport provisions, etc.) apply to recyclable waste as well.
 - (d) **Amount of Refuse.** The limit as to amount of refuse allowed per week per residence is forty-five (45) gallons. Forty-five (45) gallons is interpreted to mean a maximum of three (3) kitchen-size garbage bags or one (1) large garbage bag (thirty [30] gallon) and one (1) kitchen-size bag. This limit only applies to refuse; there is no limit as to the amount of recyclable waste that may be placed for collection.
 - (e) **Collection Fee.** The base rate for collection of refuse and recyclable waste will be ten dollars (\$10.00) per month. Nine dollars (\$9.00) of this fee are for refuse pickup; one dollar (\$1.00) is for pickup of recyclable waste. This fee covers pickup of up to forty-five (45) gallons of refuse per week. If spillage does occur, the collection crew shall immediately return spilled materials to the collection vehicle and shall properly clean, or have cleaned the area. All vehicles used for the collection and transportation of solid waste shall be durable, easily cleanable and leak proof, if necessary, considering the type of waste and its moisture content. Collection vehicles shall be cleaned frequently to prevent nuisances and insect breeding and shall be maintained in good repairs.
- (g) **Interference with Authorized Collector.** No person other than an authorized collector shall collect or interfere with any garbage after it shall have been put into a garbage receptacle and deposited in the proper place for the collector, nor shall any authorized person molest, hinder, delay or in any manner interfere with an authorized garbage collector in the discharge of his duties.

(4) Diversion of service around the meter.

(b) Disconnection for Delinquent Accounts.

(1) A bill for service is delinquent if unpaid after the due date shown on the bill. The utility may disconnect service for a delinquent bill by giving the customer at least eight (8) calendar days prior to disconnection, a written disconnect notice which may be included with the bill for service. For purposes of this rule, the due date shall not be less than twenty (20) days after issuance.

(2) The utility may disconnect without notice where a dangerous condition exists for as long as the condition exists. Service may be denied to any customer for failure to comply with the applicable requirements of the rules and regulations of the Public Service Commission or of these rules and regulations, or if a dangerous or unsafe condition exists on the customer's premises.

(3) The utility shall notify the County Department of Health and Social Services at least five (5) calendar days prior to any scheduled disconnection of residential service if the customer or responsible person has made a written request for this procedure. The utility shall apprise customers of this right upon application for service. If service to a residential customer which has been disconnected has not been restored within twenty-four (24) hours after disconnection, the utility shall notify the appropriate county Sheriff's Department of the billing name and service address and that a threat to health and life might exist to persons occupying the premises.

(c) Deferred Payment Agreement.

(1) The utility shall offer Deferred Payment Agreements to residential customers. The Deferred Payment Agreement shall provide that service will not be discontinued for the outstanding bill if the customer pays a stated reasonable amount of the outstanding bill and agrees to pay a stated reasonable portion of the remaining outstanding balance in installments until the bill is paid. In determining what amounts are "reasonable", the parties shall consider the:

- a. Size of the delinquent account.
- b. Customer's ability to pay.
- c. Customer's payment history.
- d. Time that the debt has been outstanding.
- e. Reasons why the debt has been outstanding.
- f. Any other relevant factors concerning the circumstances of the customer.

(2) In the Deferred Payment Agreement, it shall state immediately preceding the space provided for the customer's signature and in boldface print at least two (2) sizes larger than any other used thereon, the following:

"If you are not satisfied with this agreement, do not sign. If you do sign this agreement you give up your right to dispute the amount due under the agreement except for the utility's failure or refusal to follow the terms of This agreement".

(3) A Deferred Payment Agreement shall not include a finance charge.

(4) If an applicant for service has not fulfilled the terms of a Deferred Payment Agreement, the utility shall have the right to disconnect service or refuse service in accordance with these rules and under such circumstances, it shall not be required to offer subsequent negotiation of a Deferred Payment Agreement prior to disconnection.

- (5) Any payments made by the customer in compliance with a Deferred Payment Agreement, or otherwise, shall be first considered made in payment of the previous account balance with any remainder credited to the current bill.

(d) **Dispute Procedures.**

- (1) Whenever the customer advises the utility's designated office prior to the disconnection of service that all or part of any billing as rendered is in dispute, or that any matter related to the disconnection is in dispute, the company shall investigate the dispute promptly and completely, advise the customer of the results of the investigation, attempt to resolve the dispute, and provide the opportunity for the customer to enter in to a Deferred Payment Agreement when applicable in order to settle the dispute.
- (2) After the customer has pursued the available remedies with the utility, he may request that the Public Service Commission's staff informally review the disputed issue and recommend terms of settlement.
- (3) Any party to the dispute after informal review may make a written request for a formal review by the Commission. If the Commission decides to conduct a formal hearing on the dispute, the customer must pay fifty percent (50%) of the bill in dispute or post a bond for that amount on or before the hearing date. Failure to pay the amount or post the bond will constitute a waiver of the right to a hearing. Service shall not be disconnected because of any disputed matter while the disputed matter is being pursued under the dispute's procedure. In no way does this relieve the customer from the obligation of paying charges which are not disputed.
- (4) The form of disconnection notices to be used is as follows:

DISCONNECTION NOTICE

Dear Customer:

The bill enclosed with this notice includes your current charge for utility service and your previous unpaid balance.

You have 8 days to pay the utility service arrears or your service is subject to disconnection.

If you fail to pay the service arrears, or fail to contact us within the 8 days allowed to make reasonable time payment arrangements, we will proceed with disconnection action.

To avoid the inconvenience of service interruption and an additional charge of (amount) reconnection, we urge you to pay the full arrears IMMEDIATELY AT THE OFFICE.

If you have entered into a Deferred Payment Agreement with us and have failed to make the time payment you agreed to, your service will be subject to disconnection unless you pay the amount due within 8 days.

If you have a reason for delaying the payment, call us and explain the situation.

PLEASE CALL THIS TELEPHONE NUMBER, (appropriate telephone number), IMMEDIATELY IF;

1. You have a question about your utility service arrears.

2. You are unable to pay the full amount of the bill and are willing to enter into a time payment agreement with us.
3. There are any circumstances you think should be taken into consideration before service is discontinued.
4. Any resident is seriously ill.

Illness Provision

If there is an existing medical emergency in your home and you furnish the Utility with a statement signed by either a licensed Wisconsin physician, or a public health official, we will delay disconnection of service up to 21 days. The statement must identify the medical emergency and specify the period of time during which disconnection will aggravate the existing emergency.

Deferred Payment Agreements

If, for some reason, you are unable to pay the full amount of the utility service arrears on your bill, you may contact the Utility to discuss arrangements to pay the arrears over an extended period of time. This time payment agreement will require:

1. Payment of a reasonable amount at the time the agreement is made.
2. Payment of the remainder of the outstanding balance in monthly installments over a reasonable length of time.
3. Payment of all future utility service bills in full by the due date.

In any situation where you are unable to resolve billing disputes or disputes about the grounds for proposed disconnection through contacts with our utility, you may make an appeal to the Wisconsin Public Service Commission, Madison, Wisconsin.

(UTILITY NAME)

- (5) In the event the utility is not able to collect any bill for water service even though Deposit and Guarantee Rules are on file, the bill may be put upon the tax roll as provided in Sec. 66.069, Wisconsin Statutes.

SEC. 9-1-42 SURREPTITIOUS USE OF WATER.

- (a) When the utility has reasonable evidence that a consumer is obtaining his supply of water, in whole or in part, by means of devices or methods used to stop or interfere with the proper metering of the utility service being delivered to his equipment, the utility reserves the right to estimate and present immediately a bill for service unmetered as a result of such interference and such bill shall be payable subject to a twenty-four (24) hour disconnection of service. When the utility shall have disconnected the consumer for any such reason, the utility will reconnect the consumer upon the following conditions:
 - (1) The consumer will be required to deposit with the utility an amount sufficient to guarantee the payment of the consumer's bills for utility service to the utility.
 - (2) The consumer will be required to pay the utility for any and all damages to its equipment on the consumer's premises due to such stoppage or interference with its metering.

- (3) The consumer must further agree to comply with reasonable requirements to protect the utility against further losses.
- (4) Sections 98.26 and 943.20, Wisconsin Statutes, as relating to water service, are hereby adopted and made a part of these rules.

SEC. 9-1-43 VACATION OF PREMISES.

When premises are to be vacated, the utility shall be notified in writing at once, so that it may remove the meter and shut off the supply at the curb stop. The owner of the premises shall be liable to prosecution for any damage to the property of the Utility by reason of failure to notify the utility of vacancy.

SEC. 9-1-44 REPAIRS TO MAINS.

The Utility reserves the right to shut off the water in the mains temporarily, to make repairs, alterations or additions to the plant or system. When the circumstances will permit of sufficient delay, the company will give notification, by newspaper publication or otherwise, of the discontinuance of the supply. No rebate will be allowed to consumers for such temporary suspension of supply.

SEC. 9-1-45 DUTY OF UTILITY WITH RESPECT TO SAFETY OF THE PUBLIC.

It shall be the duty of the Utility to see that all open ditches for water mains, hydrants, and service pipes are properly guarded to prevent accident to any person or vehicle and at night there shall be displayed amber signal light in such manner as will, so far as possible, ensure the safety of the public.

Where they are removed, cut or damaged in the construction of a sewer, the contractor must at his own expense cause them to be replaced or repaired at once. He must not shut off the water service pipes from any consumer for a period exceeding six (6) hours.

SEC. 9-1-47 SETTLING MAIN OR SERVICE TRENCHES.

Trenches in unpaved streets shall be refilled with moist, damp earth, or by means of water tamping. When water tamping is used, the water shall be turned into the trench after the first twelve (12) inches of backfill has been placed and then the trench shall be kept flooded until the remainder of the backfill has been put in.

SEC. 9-1-48 PROTECTIVE DEVICES.

- (a) **Protective Devices in General.** The owner or occupant of every premise receiving water supply shall apply and maintain suitable means of protection of the premise supply, and all appliances thereof,

A one-half (1/2) inch drain pipe shall be connected to the relief valve for discharge on the floor or into a sink or open drain through an air gap. No stop valve shall be placed between the hot water tank and the relief valve or on the drain pipe. (See applicable Village plumbing codes).
- (c) **Air Chambers.** An air chamber or approved shock absorber shall be installed at the terminus of each riser, fixture branch, or hydraulic elevator main for the prevention of undue water hammer. The air chamber shall have a diameter not less than that of the pipe it serves and a length not less than fifteen (15) diameters of said supply pipe. Where possible, the air chamber should be provided at its base with a valve and rain cock for water drainage and replenishment of air.

SEC. 9-1-49 CROSS CONNECTION CONTROL.

TO PROVIDE A PROGRAM FOR PROTECTING THE PUBLIC WATER SYSTEM FROM CONTAMINATION DUE TO BACKFLOW OF CONTAMINANTS THROUGH THE WATER SERVICE CONNECTION INTO THE PUBLIC WATER SYSTEM

WHEREAS, Chapters NR 810 and SPS 382, Wisconsin Administrative Code, require protection for the public water system from contamination due to backflow of contaminants through the water service connection; and

WHEREAS, the Wisconsin Department of Natural Resources requires the development and implementation of a comprehensive cross connection control program to effectively prevent the contamination of potable water systems;

NOW THEREFORE, BE IT ORDAINED by the board of the village of Milltown, State of Wisconsin:

1. DEFINITION OF CROSS CONNECTION. A cross connection is defined as any physical connection or arrangement between two otherwise separate systems, one of which contains potable water from the village of Milltown's public water system, and the other of which contains water from a private source, water of unknown or questionable safety, or steam, gases, or chemicals, whereby there may be a flow from one system to the other, with the direction of flow depending on the pressure differential between the two systems.
2. UNPROTECTED CROSS CONNECTIONS PROHIBITED. No person, firm, or corporation may establish or maintain, or permit to be established or maintained, any unprotected cross connection. Cross connections shall be protected as required in ch. SPS 382, Wisconsin Administrative Code.
3. INSPECTION. The water utility may inspect, or arrange for an inspection of, property served by the public water system for cross connections. [OPTIONAL: As an alternative, the water utility may require a person, firm, or corporation who owns, leases, or occupies property to have their plumbing inspected, at their own expense by a State of Wisconsin Certified Cross Connection Inspector/Surveyor.] The frequency of inspections shall be established by the water utility in accordance with Wisconsin Administrative Code. Any unprotected cross connections identified by the inspection shall be promptly corrected. Failure to promptly correct an unprotected cross connection shall be sufficient cause for the water utility to discontinue water service to the property, as provided under paragraph 6 of this ordinance.
4. RIGHT OF ENTRY. Upon presentation of credentials, a representative of the water utility shall have the right to request entry, at any reasonable time, to a property served by a connection to the public

water system for the purpose of inspecting the property for cross connections. Refusing entry to such utility representative shall be sufficient cause for the water utility to discontinue water service to the property, as provided under paragraph 6 of this ordinance. If entry is refused, a special inspection warrant under Section 66.0119 of the Wisconsin Statutes may be obtained.

5. PROVISION OF REQUESTED INFORMATION. The water utility may request an owner, lessee, or occupant of property served by a connection to the public water system to furnish the water utility with pertinent information regarding the piping systems on the property. Refusing to provide requested information shall be sufficient cause for the water utility to discontinue water service to the property, as provided under paragraph 6 of this ordinance.

6. DISCONTINUATION OF WATER FOR VIOLATION. The water utility may discontinue water service to any property wherein any unprotected connection in violation of this ordinance exists, and take other precautionary measures deemed necessary to eliminate any danger of contamination of the public water system. Water service may be discontinued, however, only after reasonable notice and opportunity for hearing under Chapter 68, Wisconsin Statutes, except as provided in paragraph 7 of this ordinance. Water service to such property shall not be restored until the unprotected cross connection has been eliminated.

7. EMERGENCY DISCONTINUANCE. If it is determined by the water utility that an unprotected cross connection or emergency endangers public health, safety, or welfare, and requires immediate action, and if a written finding to that effect is filed with the City Clerk and delivered to the customer's premises, water service may be immediately discontinued. The customer shall have an opportunity for hearing under Chapter 68, Wisconsin Statutes, within 10 days of such emergency discontinuance. Water service to such property shall not be restored until the unprotected cross connection has been eliminated

WHEREAS, s. NR 810.16, Wisconsin Administrative Code, directs suppliers of water for municipal water systems, and communities served by municipal water systems, to implement a local well regulation program requiring proper abandonment of unused, unsafe or noncomplying wells located on premises served by the municipal water system, and to provide permits for retention of safe, code-complying wells by local ordinance or water utility rule, in order to prevent all unused, unsafe, and noncomplying wells from becoming safety hazards or channels for contamination of aquifers, and to prevent illegal cross-connections with the municipal system.

NOW THEREFORE, the Village Board of the Village of Milltown, Polk County, Wisconsin, does ordain as follows:

SECTION 1: PURPOSE

To protect public health, safety and welfare and to prevent contamination of water supplies by assuring that unused, unsafe or noncomplying wells or wells which may act as conduits for contamination of groundwater or wells which may be illegally cross-connected to the municipal water system, are properly maintained or properly filled-and-sealed.

SECTION 2: APPLICABILITY

This Ordinance applies to all wells located on premises served by the Village of Milltown municipal water system. Communities outside the jurisdiction of a supplying municipal system are also required by code, contract agreement, or utility rule to adopt and enforce equivalent ordinances within their jurisdictions for purpose stated in Section 1 above.

SECTION 5: WELL OPERATION PERMIT

Owners of wells on premises served by the municipal water system shall make application for a well operation permit for each well no later than 90 days after connection to the municipal water system or date of discovery or construction of a well. The Village of Milltown shall grant a permit to a well owner to operate a well for a period not to exceed 5 years providing all conditions of this section are met. A well operation permit may be renewed by submitting an application verifying that the conditions of this section are met. SEC. 9-1-51 WELLHEAD PROTECTION.

(a) Purpose, Authority and Application.

- (1) Purpose. The residents of the Village of Milltown depend exclusively on groundwater for a safe drinking water supply. Certain land use practices and activities can seriously threaten or degrade groundwater quality. The purpose of this Ordinance is to establish a groundwater protection overlay district to institute land use regulations and restrictions within a defined area which contributes water directly to the municipal water supply providing protection for the aquifer and municipal water supply of the Village of Milltown and promoting the public health, safety and general welfare of Village residents.

- (2) **Authority.** Statutory authority of the Village to enact these regulations was established by Wisconsin Legislature in §61.35, Wis. Stats., which provides the statutory authorization for municipal planning and zoning to protect the public health, safety and welfare.
- (3) **Application.** The regulations specified in this Wellhead Protection Ordinance shall apply within the area surrounding each municipal water supply well that has been designated as a “wellhead protection area” by the Village’s most recent and up to date wellhead protection plan, and are in addition to the requirements in the underlying zoning district, if any. If there is a conflict between this chapter and the zoning ordinance, the more restrictive provision shall apply.

NOTE: Wellhead protection areas are derived from hydrologic studies and are based on the area surrounding a well where groundwater takes 5 years or less to travel from the land surface to the pumping well.

(b) Definitions.

- (1) **Aquifer.** “Aquifer” means a saturated permeable, geologic formation that contains, and will yield, significant quantities of water.
- (2) **Existing facilities.** “Existing facilities” means current facilities, practices and activities which may cause or threaten to cause environmental pollution within that portion of the Village’s wellhead protection area that lies within the corporate limits of the Village. Existing facilities include but are not limited to the type listed in the Department of Natural Resources’ form 3300-215, Public Water Supply Potential Contaminant Use Inventory Form which is incorporated herein as if fully set forth.
- (3) **Groundwater Protection Overlay District.** “Groundwater Protection Overlay District” means that area of land which contributes water to a municipal well based on accepted hydrogeological research, outlined and described as a “Wellhead Protection Area” by the Village’s wellhead protection plan.
- (4) **Recharge Area.** “Recharge area” means the land area which contributes water to a well by infiltration of water into the subsurface and movement with groundwater toward the well. This area may extend beyond the corporate limits of the Village of Milltown.
- (5) **Hazardous Chemicals.** “Hazardous Chemicals” means Chemicals and chemical mixtures that is required to have an MSDS and meets the definition of hazardous chemical under the OSHA regulations found at 29 CFR 1910.1200(c). Substances packaged for consumption for humans or animals are not considered Hazardous Chemicals. Hazardous Chemicals include:
 - (a) Chemicals for which there is scientific evidence that acute or chronic health effects may result from exposure including carcinogens, toxic and highly toxic agents, irritants, corrosives, sensitizers, hepatotoxins, agents that act on the hematopoietic system, reproductive toxins, and agents which damage the lungs, skin, eyes, or mucous membranes as defined in 29 CFR 1910.1200, Appendix A, “Health Hazard Definitions (Mandatory)”.
 - (b) Mixtures of chemicals which have been tested as a whole and have been determined to be a health hazard.
 - (c) Mixtures of chemicals which have not been tested as a whole but which contain any chemical which has been determined to be a health hazard and comprises one (1.0) percent or greater of the composition on a weight-per-unit weight basis.
 - (d) Mixtures of chemicals which include a carcinogen if the concentration of the carcinogen in the mixture is one-tenth of one (0.1) percent or greater of the composition on a weight-per-unit weight basis.
 - (e) Ingredients of mixtures prepared within the Groundwater Protection Overlay District in cases where such ingredients are health hazards but comprise more than one-tenth of one

- (0.1) percent of the mixture on a weight-per-unit weight basis if carcinogenic, or more than one (1.0) percent of the mixture on a weight-per-unit weight basis if non-carcinogenic.
- (f) Petroleum and non-solid petroleum derivatives (except non-PCB dielectric fluids used in equipment or for transmission of electric power to homes and businesses).

(6) Well Field. “Well Field” means a piece of land used primarily for the purpose of supplying a location for construction of wells to supply a municipal water system.

(c) Groundwater Protection Overlay District.

The boundaries of the Groundwater Protection Overlay Districts shall be shown on the Village of Milltown zoning map. The locations and boundaries of the zoning districts established by this chapter are set forth in the Village of Milltown’s most recent and up to date wellhead protection plan [on file in the office of the Village Clerk] incorporated herein and hereby made a part of this Ordinance. Said figures, together with everything shown thereon and all amendments thereto, shall be as much a part of this chapter as though fully set forth and described herein. This Ordinance and thus promotes public health, safety, and welfare. The groundwater protection overlay district is intended to protect the groundwater recharge area for the water supply from contamination. The Groundwater Protection Overlay District is divided in Zone A and Zone B:

(1) **ZONE A OF GROUNDWATER PROTECTION OVERLAY DISTRICT.** Zone A is the area nearest to the wells where groundwater protection is the most important. Zone A is subject to the most stringent land use and development restrictions because of the close proximity to the wells and the corresponding high threat of contamination.

(A) **Permitted Uses.** The following uses are permitted in the Groundwater Protection Overlay District subject to the separation’s distances in Section 4.

- (a) Parks; provided there is no on-site waste disposal or fuel storage tank facilities associated with this.

- (f) Routine tillage, planting and field management operations in support of agricultural crop production, where nutrients from legume, manure, and commercial sources are accounted for and credited toward crop nutrient need. The combination of all nutrient sources applied or available on individual fields may not exceed University of Wisconsin soil test recommendations for that field.

(B) **Conditional Uses.** The following uses may be conditionally permitted in Zone 1 subject to separations distances in Section 4:

- (a) Hydrocarbon, petroleum or hazardous chemical storage tanks. (Hazardous chemicals are identified by OSHA under 29 CFR 1910.1200(c) and by OSHA under 40 CFR Part 370).
- (b) Motor vehicle services, including filing and service stations, repair, renovation and body work.

These installations shall meet the most restrictive install requirements of s. ATPC 93.260, Wis. Admin. Code, and receive written approval from the department of commerce or its designated Local Program Operator under s. ATPC 93.110, Wis. Admin. Code. If this debt is not paid within twenty (20) days after it is due and payable, it shall be deemed delinquent and may be recovered by civil action in the name of the Village against the property owner, the person or both. If delinquent payments are not received by November 1st of the calendar year, a ten percent (10%) charge shall be added to delinquent bills. Thereafter, if payment is not received prior to November 15th, the delinquent bill will be forwarded to the county for placement on the succeeding tax roll.

Article A: Introduction

Sec. 11-7-1 Statement of Findings and Intent

(a) **Intent.** It is the intent of this Chapter to regulate sexually oriented businesses and related activities to promote the health, safety and general welfare of the citizens of the Village of Milltown and to establish reasonable and uniform regulations to prevent the deleterious location and concentration of sexually oriented business within the Village. The provisions of this Chapter have neither the purpose nor effect of imposing a limitation or restriction on the content of any communicative materials, including sexually oriented materials. Similarly, it is neither the intent nor effect of this Chapter to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market. Neither is it the intent nor effect of this Chapter to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to this intended market. Neither is it the intent nor effect of this Chapter to condone or legitimize the distribution of obscene materials.

(b) **Findings**

- (1) It is a lawful purpose of the Village Board to enact rules and regulations as are necessary for the preservation of health and to prevent the spread of AIDS and other communicable or sexually transmitted diseases in the Village of Milltown. It has been found by localities through the State of Wisconsin, particularly Milwaukee, Racine, Waukesha, Delafield, Kenosha and West Allis, as well as communities around the country, including Indianapolis, Indiana; Austin, Texas; Chattanooga, Tennessee; Newport News, Virginia; Marion County, Indiana; Detroit, Michigan; and Seattle, Washington; as well as other communities around the country, that sexually oriented adult entertainment establishments are predisposed to the creation of unsafe and unsanitary conditions; that operators and employees of such businesses tend to participate in sex-related offenses on the premises, creating substantial law enforcement problems, and that the operational characteristics of such businesses have a deleterious effect on surrounding areas, resulting in neighborhood blight and reduced property values, especially when such businesses are concentrated in one (1) area. Many of such establishments install movie viewing booths with doors in which patrons view videotapes, movies, films and other forms of entertainment characterized by their emphasis on depicting, describing or relating to specified sexual activities or specified anatomical areas, and that such booths have been and are being used by patrons to engage in sexual acts resulting in unsanitary, unhealthy and unsafe conditions in said booths and establishments. This Chapter is intended to establish standards in order to prevent the spread of AIDS and other communicable or sexually transmitted diseases, and to eliminate the deleterious effects described above in the Village of Milltown.
- (2) The Village Board recognized that "Class B" licensed premises are the most likely location to conduct a live nude dancing business and that this sexually oriented adult entertainment activity

could lead to the exploitation of human sexuality. Such exploitation takes the form of employing or permitting persons to perform or exhibit their nude or semi-nude bodies to other patrons as an inducement to the patrons to purchase alcohol beverages. The result of such exploitation is both direct and secondary criminal activity, moral degradation and disturbance of the peace and good order of the community. In addition, this commercial exploitation of such nude and semi-nude acts is adverse to the public's interest in the quality of life, commercial activity and total community environment of the Village of Milltown.

- (3) The Village Board also recognizes that it lacks authority to regulate obscenity in light of Sec. 66.051(3), Wis. Stats., and does not intend by adopting this Chapter to regulate obscenity, since nudity in and of itself is not obscene; it declares its intent to enact an ordinance addressing the secondary effects of live, totally nude, non-obscene, erotic dancing in bars or taverns.
- (4) Based on evidence concerning the adverse secondary effects of adult uses on communities stated above, and on findings incorporated in the cases of *City of Renton v. Playtime Theatres, Inc.*, 475 U.S. 41 (1986); *Young v. American Mini Theatres*, 426 U.S. 50 (1976); and *Barnes v. Glen Theatre, Inc.*, 501 U.S. 560 (1991); *Arcara v. Cloud Books, Inc.* 478 U.S. 697, (1986); *California v. LaRue*, 409 U.S. 109 (1972); *Iacobucci v. City of Newport, Ky.*, 479 U.S. 92 (1986); *United States v. O'Brien*, 391 U.S. 367 (1968); *DLS, Inc. v. City of Chattanooga*, 107 F.3d 403 (6th Cir. 1997); *Key, Inc. v. Kitsap County*, 793 F.2d 1053 (9th Cir. 1986); *Hang On, Inc. v. City of Arlington*, 65 F.3d 1248 (5th Cir. 1995); and *South Florida Free Beaches, Inc. v. City of Miami*, 734 F.2d 608 (11th Cir 1984), and findings reported in the Final Report of the Attorney General's Working Group on the Regulation of Sexually Oriented Businesses (June 6, 1989, State of Minnesota), and statistics obtained from the U.S. Department of Health and Human Services, Centers for Disease Control and Prevention, the Village Board finds that:
 - a. Crime statistics show that all types of crimes, especially sex-related crimes, occur with more frequency in neighborhoods where sexually oriented businesses are located.
 - b. Studies of the relationship between sexually oriented businesses and neighborhood property values have found a negative impact on both residential and commercial property values.
 - c. Sexually oriented businesses may contribute to an increased public health risk through the spread of sexually transmitted diseases.
- (c) **Exemptions.** The provisions of this Chapter do not apply to the following establishments: theaters, performing arts centers, civic centers, and dinner theaters where live dance, ballet, music and dramatic performances of serious artistic, social or political merit are offered on a regular basis; and in which the predominant business or attraction is not the offering of entertainment which is intended for the sexual interests or titillation of customers; and where the establishment is not distinguished by an emphasis on or the advertising or promotion of nude or semi-nude performances. While expressive live nudity may occur within these establishments, this Chapter seeks only to minimize and prevent the secondary effects of adult oriented establishments or sexually oriented businesses on the community. Negative secondary effects have not been associated with these establishments.

The Plan Commission, in applying the provisions of the Section, shall, in writing, recite the particular facts upon which it bases its conclusion that the land is not suitable for certain uses. The applicant shall have an opportunity to present evidence contesting such unsuitability if he so desires. Thereafter, the Plan Commission may affirm, modify or withdraw its determination of unsuitability when making its recommendation to the Village Board.

- (f) **Preservation of Topography.** In order to protect the property owner from possible damage due to change in the existing grade of adjoining lands and to aid in preserving and protecting the natural beauty and character of the landscape, no change in the existing topography of any land shall be made which would result in increasing any portion of the slope to a ratio greater than one and one-half (1 ½) horizontal to one (1) vertical, within a distance of twenty (20) feet from the property line, except with the written consent of the owner of the abutting property and with the approval of the Village Board, or which would alter the existing drainage or topography in any way as to adversely affect the adjoining property. Conditional Uses

SEC. 13-1-60 STATEMETN OF PURPOSE – CONDITIONAL USES.

The development and execution of this Article is based upon the division of the Village into districts, within which districts the use of land and buildings, and bulk and location of buildings and structures in relation to the land, are mutually compatible and substantially uniform. However, there are certain uses which, because of their unique characteristics, cannot be properly classified as unrestricted permitted uses in any particular district or districts, without, consideration, in each case, of the impact of those uses upon neighboring land or public facilities, and of the public need for the particular use of a particular location. Such uses, nevertheless, may be necessary or desirable to be allowed in a particular district provided that due consideration is given to location, development and operation of such uses. Such uses are classified as conditional uses.

SEC. 13-1-61 AUTHORITY OF THE PLAN COMMISSION NAD VILLAGE BOARD; REQUIREMENTS.

- (a) The Village Board may, by resolution, authorize the Zoning Administrator to issue a conditional use permit for either regular or limited conditional use after review, public hearing and advisory recommendation from the plan Commission, provided that such conditional use and involved structure(s) are found to be in accordance with the purpose and intent of this Zoning Code and are further found to be not hazardous, harmful, offensive or otherwise adverse to the environment or the value of the neighborhood or the community. In the instance of the granting of limited conditional use, the Village Board in its findings shall further specify the delimiting reason(s) or factors which resulted in issuing limited rather than regular conditional use. Such Board resolution and the resulting conditional use permit, when, for limited conditional use, shall specify the period of time for which effective, if specified, the name of the permittee, the location and legal description of the affected premises. Prior to the granting of a conditional use, the Commission shall make findings based upon the evidence presented that the standards herein prescribed are being complied with.
- (b) Any development within five hundred (500) feet of the existing or proposed rights-of-way of freeways, expressways and within one-half (1/2) mile of their existing or proposed interchange or turning lane rights-of-way shall be specifically reviewed by the highway agency that has jurisdiction over the traffic way. The Plan Commission shall request such review and await the highway agency's recommendation for a period not to exceed twenty (20) days before taking final action.
- (c) Conditions such as landscaping, architectural design, type of construction, construction commencement and completion dates, sureties, lighting, fencing, planting screens, operation control, hours of operation, improved traffic circulation, deed restrictions, highway access restrictions, increased yards or parking requirements may be required by the Village Board upon its finding that these are necessary to fulfill the purpose and intent of this Chapter.
- (d) Compliance with all other provisions of this Chapter, such as lot width and area, yards, height, parking, loading, traffic, highway access and performance standards shall be required of all conditional uses.

SEC. 13-1-62 INITIATION OF CONDITIONAL USE.

Any person, firm, corporation or organization having a freehold interest or a possessory interest entitled to exclusive possession, or a contractual interest which may become a freehold interest, or an exclusive possessory interest, and which is specifically enforceable in the land for which a conditional use is sought may file an application to use such land for one (1) or more of the conditional uses provided for in this Article in the zoning district in which such land is located.

SEC. 13-1-63 APPLICATION FOR CONDITIONAL USE.

An application for a conditional use shall be filed on a form prescribed by the Village. The application shall be accompanied by a plan showing the location, size and shape of the lot(s) involved and of any proposed structures, the existing and proposed use of each structure and lot, and shall include a statement in writing by the applicant and adequate evidence showing that the proposed conditional use shall conform to the standards set forth in Section 13-1-66 hereinafter. The Plan Commission may require such other information as may be necessary to determine and provide for an enforcement of this Chapter, including a plan showing contours and soil types; high water mark and groundwater conditions; bedrock, vegetative cover, specifications for areas of proposed filling, grading, and lagooning; location of buildings, parking areas, traffic access, driveways, walkways, open spaces and landscaping; plans of buildings, sewage disposal facilities, water supply systems and arrangements of operations. A non-refundable fee of seventy-five dollars (\$75.00) shall be paid at the time of application.

SEC. 13-1-64 HEARING ON APPLICATION.

All requests for conditional uses shall be to the Plan Commission or the Plan Commission can, on its own motion, apply conditional uses when applications for rezoning come before it. Nothing in this Chapter shall prohibit the Village Board, on its own motion, from referring the request for conditional use to the Plan Commission. Upon receipt of the application and statement referred to in Section 13-1-63 above, the Plan Commission shall hold a public hearing on each application for a conditional use at such time and place as shall be established by such Commission. The hearing shall be conducted and a record of the proceedings shall be preserved in such a manner and according to such procedures as the Plan Commission shall, by rule, prescribe from time to time.

SEC. 13-1-65 NOTICE OF HEARING ON APPLICATION.

If such action has not been reported by the Plan Commission within thirty (30) days, the Village Board can act without such recommendation.

SEC. 13-1-66 STANDARDS – CONDITIONAL USES.

No application for a conditional use shall be recommended for approval by the Plan Commission or granted by the Village Board unless such Commission and Board shall find all of the following conditions are present:

- (a) That the establishment, maintenance or operation of the conditional use will not be detrimental to or endanger the public health, safety, morals, comfort or general welfare.
- (b) That the uses, values and enjoyment of other property in the neighborhood for purposes already permitted shall be in no foreseeable manner substantially impaired or diminished by the establishment, maintenance or operation of the conditional use and the proposed use is compatible with the use of adjacent land.

- (g) That the proposed use does not violate flood plain regulations governing the site.
- (h) That, when applying the above standards to any new construction of a building or an addition to an existing building, the Plan Commission and Board shall bear in mind the statement of purpose for the zoning district such that the proposed building or addition at its location does not defeat the purposes and objective of the zoning district.

 - (1) The maintenance of safe and healthful conditions.
 - (2) The prevention and control of water pollution including sedimentation.

SEC. 13-1-67 DENIAL OF APPLICATION FOR CONDITIONAL USE PERMIT.

SEC. 13-1-68 CONDITIONS AND GUARANTEES.

The following conditions shall apply to all conditional uses:

- (a) **Conditions.** Prior to the granting of any conditional use, the Village Board may stipulate such conditions and restrictions upon the establishment, location, construction, maintenance and operation of the conditional use as deemed necessary to promote the public health, safety and general welfare of the community, and to secure compliance with the standards and requirements specified in Section 13-1-66 above. In all cases in which conditional uses are granted, the Board shall require such evidence and guarantees as it may deem necessary as proof that the conditions stipulated in connection therewith are being and will be complied with. Such conditions may include specifications for, without limitation because of specific enumeration:
 - (1) Landscaping;
 - (2) Type of construction;
 - (3) Construction commencement and completion dates;
 - (4) Sureties;
 - (5) Lighting;
 - (6) Fencing
 - (7) Operational control;
 - (8) Hours of operation;
 - (9) Traffic circulation;

- (e) **Sloped Sites; Unsuitable Soils.** Where slopes exceed six percent (6%) and/or where a use is proposed to be located on areas indicated as having soils which are unsuitable or marginal for development, on-site soil tests and/or construction plans shall be provided which clearly indicate that the soil conditions are adequate to accommodate the development contemplated and/or that any inherent soil condition or slope problems will be overcome by special construction techniques. Such special construction might include, among other techniques, terracing, retaining walls, oversized foundations and footings, drain tile, etc.

- (f) **Conditional Uses to Comply with Other Requirements.** Conditional uses shall comply with all other provisions of this Chapter such as lot width and area, yards, height, parking and loading.

SEC. 13-1-69 VALIDITY OF CONDITIONAL USE PERMIT.

Time limits on development of a conditional use. Unless extended as a condition of approval, the start of construction of any and all conditional uses shall be initiated within 365 days of their approval by the Village Board and shall be operational within 730 days of said approval. Failure to initiate development within this period shall automatically constitute a revocation of the conditional use. The Board may extend such permit for a period of time for justifiable cause, if application is made to the Village Board at least thirty (30) days before the expiration of said permit.

SEC. 13-1-70 COMPLAINTS REGARDING CONDITIONAL USES.

The Village Board shall retain continuing jurisdiction over all conditional uses for the purpose of resolving complaints against all previously approved conditional uses. Such authority shall be in addition to the enforcement authority of the Zoning Administrator to order the removal or discontinuance of any unauthorized alterations of an approved conditional use, and the elimination, removal or discontinuance of any violation of a condition imposed prior to or after approval or violation of any other provision of this Code. Upon written complaint by any citizen or official and after seeking an advisory recommendation from the Plan Commission, the Village Board shall initially determine whether said complaint indicates a reasonable probability that the subject conditional use is in violation of either one (1) or more of the standards set forth in Section 13-1-66 above, a condition of approval or other requirement imposed hereunder. Upon reaching a positive initial determination, a hearing shall be held upon notice as provided in Section 13-1-65 above. Any person may appear at such hearing and testify in person or represented by an agent or attorney. The Village Board may, in order to bring the subject conditional use into compliance with the standards set forth in Section 13-1-66 or conditions previously imposed by the Village Board, modify existing conditions upon such use and impose additional reasonable conditions upon the subject conditional use. In the event that no reasonable modification of such conditional use can be made in order to assure that Standards (1) and (b) in Section 13-1-66 will be met, the Village Board may revoke the subject conditional approval and direct the Zoning Administrator and the Village Attorney to seek elimination of the subject use. Following any such hearing, the decision of the Village Board shall be furnished to the current owner of the conditional use in writing stating the reasons therefor.

Signal Receiving Antennas; Wind Energy Systems

Sec. 13-1-130 SIGNAL RECEIVING ANTENNAS.

- (a) **Purpose.** This Section regulating the placement of signal receiving antennas is adopted to:
- (1) (1) Provide uniform regulation of all signal receiving antenna devices;
 - (2) Secure placement of such antennas in an aesthetically sensitive manner while allowing users reasonable reception of signals;
 - (3) Protect the public from injury from antennas that are inadequately mounted, unduly susceptible to wind pressure, improperly installed and wired. Or are placed on structures insufficiently designed or constructed to safely support the antenna; and
 - (4) Provide for placement of such antennas in locations that preserve access to rear property areas by firefighting apparatus and emergency personnel.
- (b) **Permit Required.** No owner shall, within the Village of Milltown, build, construct, use or place any type of signal receiving antenna until a permit shall have first been obtained from the Building Inspector.
- (c) **Definitions.**
- (1) For purposes of this Section, a “signal receiving antenna” is defined as any apparatus capable of receiving communications from a transmitter or a transmitter relay located in a planetary orbit. This definition includes all types of signals receiving antennas, including, without limitation, parabolic television antennas, and AM, FM, ham and short-wave radio antennas regardless of the method of mounting.
 - (2) “Owner” means the holder of record of an estate in possession in fee simple, or for life, in land or real property, or a vendee of record under a land contract for the sale of an estate in possession in fee simple or for life but does not include the vendor under a land contract. A tenant in common or joint tenant shall be considered such owner to the extent of his interest. The personal representative of at least one (1) owner shall be considered an owner.
- (d) **Application.** Application for a signal receiving antenna permit shall be made in writing to the Building Inspector. There shall be no permit fee. With such application, there shall be submitted a sufficient set of mounting plans and specifications, including a general plot plan showing the location of the proposed signal receiving antenna with respect to streets, lot lines and buildings. If such application meets all requirements of this Section, the application shall be approved.
- (e) **Installation Standards.** Signal receiving antennas installed in any zoning district within the Village shall comply with the following provisions:
- (1) Setbacks.
 - a. Any signal receiving antenna and its mounting post shall be located a minimum of ten (10) feet from any property line.
 - b. Subject to the provisions herein, signal receiving antennas shall only be located in the rear yard of any lot. If reasonable reception of signals is not possible with a rear yard placement due to the physical characteristics of the lot and area, the signal receiving antenna shall be placed in the side yard of the lot. In the event that reasonable reception of signals is not possible by locating the signal receiving antenna, on the rear or side yard of the property,

such antenna may be placed in the front yard or on the roof of structures on the property. For corner lots, a side yard is only a yard that does not face a street.

- c. If side yard, front yard or roof mounting is requested, the Building Inspector shall determine where reasonable reception is possible, based on evidence provided by the person seeking to erect or construct the antenna.
- (2) Mounting. Signal receiving antennas attached to the wall or roof of any principal or accessory structure shall be permitted only if the structure is properly constructed to carry all imposed loading and complies with applicable state and local building code requirements. The Building Inspector may require engineering calculations.
- (3) Diameter. The diameter of the signal receiving antenna shall not exceed fifteen (15) feet in diameter, except for systems used to provide community antenna television services.
- (4) Height.
 - a. A ground-mounted signal receiving antenna, including any platform or structure upon which said antenna is mounted or affixed, may not exceed eighteen (18) feet in height, as measured from the ground to the highest point of the dish.
 - b. A roof-mounted antenna may not exceed fifteen (15) feet in height above the surrounding roof line as measured from the lowest point of the existing roof line.
- (5) Wind Pressure. All signal receiving antennas shall be permanently mounted in accordance with the manufacturer's specifications for installation. All such installations shall meet a minimum wind load design velocity of eighty (80) mph.
- (6) Electrical Installations. Electrical installations in connection with signal receiving antennas, including grounding of the system, shall be in accordance with the National Electrical Safety Code, Wisconsin State Electrical Code and the instructions of the manufacturer. In cases of conflict, the stricter requirements shall govern. All cable used to conduct current or signals from the signal receiving antenna to the receivers shall be installed underground unless installation site conditions preclude underground. If a signal receiving antenna is to be used by two (2) or more residential property owners, all interconnecting electrical connections, cables and conduits must also be buried. The location of all such underground lines, cables and conduits shall be shown on the application for a permit. All cables and conduits shall be shown on the application for a permit. All signal receiving antennas shall be grounded against direct lightning strikes.
- (7) Temporary Placement. No portable or trailer-mounted signal receiving antenna shall be allowed, except for temporary installation for on-site testing and demonstration purposes for periods not exceeding five (5) days. However, such trial placement shall be in accordance with all provisions of this Section. Failure to comply shall result in a citation being issued for violation of this Section. Any person making such temporary placement shall first give written notice to the Building Inspector of the date when such placement shall begin and end.
- (8) Advertising. No form of advertising or identification, sign or mural is allowed on the signal receiving antenna other than the customary manufacturer's identification plates.
- (9) Interference with Broadcasting. Signal receiving antennas shall be filtered and/or shielded so as to prevent the emission or reflection of an electromagnetic radiation that would cause any harmful interference with the radio and/or television broadcasting or reception on adjacent properties. In the event that harmful interference is caused subsequent to its installation, the owner of the signal receiving antenna shall promptly take steps to eliminate the harmful interference in accordance with Federal Communications Commission regulations.
- (10) Compliance with Federal Regulation. The installation and use of every signal receiving antenna shall be in conformity with the Federal Cable Communications Policy Act of 1984 and regulations adopted thereunder.

(11) Aesthetic Considerations. Signal receiving antennas shall be located and designed to reasonable reduce visual impact from surrounding properties at street level.

(f) **Enforcement.**

- (1) It shall be unlawful to construct, use, build or locate any signal receiving antenna in violation of any provision of this Section. In the event of any violation, the Village Board or any property owner who would be specifically damaged by such violation may institute appropriate action or proceedings to enjoin a violation of this Section.
- (2) Any person, firm or corporation who fails to comply with the provisions of this Section shall, upon conviction, be subject to the general penalty found in Section 1-1-6.

SEC. 13-1-131 SPECIAL USE PERMITS REQUIRED – WIND ENERGY SYTEMS.

- (a) **Approval Required.** No owner shall, within the Village, build, construct, use or place any type or kind of wind energy system without holding the appropriate conditional use permit for said system.
- (b) **Separate Permit Required for each System.** A separate conditional use permit shall be required for each system. Said permit shall be applicable solely to the systems, structures, use and property described in the permit.
- (c) **Basis of Approval.** The Village Board and Plan Commission shall base their determinations on general considerations as to the effect of such grant on the health, general welfare, safety and economic prosperity of the Village and, specifically, of the immediate neighborhood in which such use would be located, including such considerations as the effect on the established character and quality of the area, its physical attractiveness, the movement of traffic, the demand for related services, the possible hazardous, harmful, noxious, offensive or nuisance effect as a result of noise, dust, smoke or odor and such other factors as would be appropriate to carry out the intent of the Zoning Code.
- (d) **Definitions.** “Wind energy systems” shall mean “windmills” which are used to produce electrical or mechanical power.

SEC. 13-1-132 PERMIT PROCEDURE – WIND ENERGY SYSTEMS.

- (a) **Application.** The permit application for a wind energy system shall be made to the Building Inspector on forms provided by the Village. The application shall include the following information:

 - (2) The address of the property on which the system will be located.
 - (3) Applications for the erection of a wind energy conversion system shall be accompanied by a plat or survey for the property to be served showing the location of the generating facility and the means by which the facility will provide power to structures. If the system is intended to provide power to more than one (1) premise, the plat or survey shall show all properties to be served and the means of connection to the wind energy conversion system. A copy of all agreements with system users off the premises shall accompany the application. The application shall further indicate the level of noise to be generated by the system and provide assurances as to the safety features of the system. Energy easements shall accompany the application.
 - (4) An accurate and complete written description of the use for which special grant is being requested, including pertinent statistics and operation characteristics.

- (5) Plans and other drawings showing proposed development of the site and buildings, including landscape plans, location of parking and the service areas, driveways, exterior lighting, type of building material, etc., if applicable.
- (6) Any other information which the Building Inspector or Village Board may deem to be necessary to the proper review of the application.
- (7) The Building Inspector shall review the application and, if the application is complete and contains all required information, shall refer it to the Village Board.
- (b) **Hearing.** Upon referral of the application the Village Board shall schedule a public hearing thereof following the procedures for conditional use permits in Article D.
- (c) **Determination.** Following public hearing and necessary study and investigation, the Village Board shall, as soon as practical, render its decision and a copy be made a permanent part of the Board's minutes. Such decision shall include an accurate description of the special use permitted, of the property on which permitted and any and all conditions made applicable thereto, or, if disapproved, shall indicate the reasons for disapproval. The Village Board may impose any conditions or exemptions necessary to minimize any burden on the persons affected by granting the special use permit.
- (d) **Termination.** When a special use does not continue in conformity with the conditions of the original approval, or where a change in the character of the surrounding area or of the use itself cause it to be no longer compatible with surrounding areas, or for similar cause based upon consideration for the public welfare, the special grant may be terminated by action of the Village Board following a public hearing thereon.
- (e) **Changes.** Subsequent change or addition to the approved plans or use shall first be submitted for approval to the Village Board and if, in the opinion of the Board, such change or addition constitutes a substantial alteration, a public hearing before the Village Board shall be required and notice thereof be given.
- (f) **Approval does not Waive Permit Requirements.** The approval of a permit under this Article shall not be construed to waive the requirement to obtain electrical, building or plumbing permits prior to installation of any system.

SEC. 13-1-133 SPECIFIC REQUIREMENTS REGARDING WIND ENERGY SYSTEMS.

- (a) **Additional Standards.** Wind energy conversion systems, commonly referred to as "windmills", which are used to produce electrical power, shall also satisfy the requirements of this Section in addition to those found elsewhere in this Article.
- (b) **Application.** Applications for the erection of a wind energy conversion system shall be accompanied by a plat or survey for the property to be served showing the location of the generating facility and the means by which the facility will provide power to structures. If the system is intended to provide power to more than one (1) premise, the plat or survey shall show all properties to be served and the means of connection to the wind energy conversion system. A copy of all agreements with system users off the premises shall accompany the application. The application shall further indicate the level of noise to be generated by the system and provide assurances as to the safety features of the system. Energy easements shall accompany the application.
- (c) **Construction.** Wind energy conversion systems shall be constructed and anchored in such a manner to withstand wind pressure of not less than forty (40) pounds per square foot in area.
- (d) **Noise.** The maximum level of noise permitted to be generated by a wind energy conversion system shall be fifty (50) decibels, as measured on a dB(A) scale, measured at the lot line.

- (e) **Electro-magnetic Interference.** Wind energy conversion system generators and alternators shall be filtered and/or shielded so as to prevent the emission of radio-frequency energy that would cause any harmful interference with radio and/or television broadcasting or reception. In the event that harmful interference is caused subsequent to the granting of a conditional use permit, the operator of the wind energy conversion system shall promptly take steps to eliminate the harmful interference in accordance with Federal Communications Commission regulations.
- (f) **Location and Height.** Wind energy conversion systems shall be located in the rear yard only and shall meet all setback and yard requirements for the district in which they are located and, in addition, shall be located not closer to a property boundary than a distance equal to their height. Wind energy conversion systems are exempt from the height requirements of this Chapter; however, all such systems over seventy-five (75) feet in height shall submit plans to the Federal Aviation Administration (FAA) to determine whether the system is to be considered an object affecting navigable air space and subject to FAA restrictions. A copy of any FAA restrictions imposed shall be included as a part of the wind energy conversion system conditional use permit application.
- (g) **Fence Required.** All wind energy conversion system shall be surrounded by a security fence not less than six (6) feet in height. A sign shall be posted on the fence warning of high voltages.
- (h) **Utility Company Notification.** The appropriate electric power company shall be notified, in writing, of any proposed interface with that company's grid prior to installing said interface. Copies of comments by the appropriate utility company shall accompany and be part of the application for a conditional use permit.

 - (3) For the purposes of this Section, "unnecessary hardship" shall be defined as an unusual or extreme decrease in the adaptability of the property to the uses permitted by the zoning district which is caused by facts, such as rough terrain or good soil conditions, uniquely applicable to the particular piece of property as distinguished from those applicable to most or all property in the same zoning district.

- (d) **Action of the Board of Appeals.** For the Board to grant a variance, it must find that:
- (1) Denial of variation may result in hardship to the property owner due to physiographical consideration. There must be exceptional, extraordinary or unusual circumstances or conditions applying to the lot or parcel, structure, use or intended use that do not apply generally to other properties or uses in the same district and the granting of the variance would not be of so general or recurrent nature as to suggest that the Zoning Code should be changed.

The floodway, which includes the channel, is that portion of the floodplain not suited for human habitation.  - (2) On request of the subdivider, the contract may provide for completion of part or all of the improvements covered thereby prior to acceptance of the plat, and in such event the amount of the deposit or bond shall be reduced in a sum equal to the estimated cost of the improvements so completed prior to acceptance of the plat only. If the required improvements are not complete within the specified period, all amounts held under performance bond shall be turned over and delivered to the Village and applied to the cost of the required improvements. Any balance remaining after such improvements have been made shall be returned to the owner or subdivider. The Village Board, at its option, may extend the bond period for additional periods not to exceed two (2) years each period.

- (2) Proposed grades will be reviewed by the Village Engineer for conformance with Village standards and good engineering practice. Street grades require the approval of the Village Board after receipt of the Village Engineer's recommendations.
- (3) After installation of temporary block corner monuments by the subdivider and the establishment of street grades by the Village Engineer, the subdivider shall grade the full width of the right-of-way of the streets and alleys proposed to be dedicated, including the vision clearance triangle on corner lots, followed by surfacing required by this Chapter.
- (4) In cases where an existing street right-of-way is made a part of the plat or abuts the plat, the subdivider shall grade that portion of the right-of-way between the existing pavement and the property line.
- (5) The bed for the roadways in the street rights-of-way shall be graded to subgrade elevation.
- (6) The Village Engineer shall approve all grading within rights-of-way and said grading shall extend for a sufficient distance beyond the right-of-way to ensure that the established grade will be preserved.
- (7) Where electric and other communications or utilities facilities are to be installed underground, the utility easements shall be graded to within six (6) inches of the final grade by the subdivider, prior to the installation of such facilities; earth fill piles or mounds of dirt or construction materials shall not be stored on such easement's areas.
- (8) Cut and filled lands shall be graded to a maximum slope of one to four (1:4) or the soil's angle of repose, whichever is the lesser, and covered with permanent vegetation.
- (e) **Street Construction.** After sanitary sewer, storm sewer, water, and other necessary utilities have been installed, the subdivider shall construct and dedicate as part of the subdivision, streets and curbs and gutters. The subdivider shall surface roadways to the widths prescribed by Village specifications. Construction shall be to Village standard specifications for street improvements.
- (f) **Completion of Street Construction.**
 - (1) No building permit shall be issued for the construction of any residential dwelling until sewer, water, grading graveling and paving are installed in the streets necessary to service the property for which the permit is required.
 - (2) The Village Board may issue a waiver of these requirements in unusual or special circumstances such as excessively severe weather conditions, heavy construction temporarily in area or construction material shortages (i.e., cement, asphalt). The issuance of a waiver shall be at the discretion of the Village Board.
 - (3) The subdivider requesting a waiver shall do so in writing, presenting such information and documentation as required by the Village Board. The waiver shall be in written form and shall detail which improvement requirements are temporarily waived and for what period of time.

SEC. 14-1-54 CURB AND GUTTER.

After the installation of all utility and storm water drainage improvements, the subdivider shall construct concrete curbs and gutters, where required by the Village Board, in accordance with plans and standard specifications approved by the Village Board, on file with the Village Clerk-Treasurer. Wherever possible, provision shall be made at the time of construction for driveway access curb cuts.

SEC. 14-1-55 SIDEWALKS.

- (a) In all subdivisions and minor land divisions, the Village Board may require the subdivider to construct a concrete sidewalk on one (1) side of all frontage streets, and on one (1) or both sides of

all other through, minor, cul-de-sac, dead end, arterial and/or continuous streets within the subdivision. The construction of all sidewalks shall be in accordance with plans and standard specifications approved by the Village Engineer.

- (b) In addition, wider-than-standard sidewalks may be required by the Village Board in the vicinity of schools, commercial areas and other places of public assemblage, and the Village Board may require the construction of sidewalks in locations other than required under the preceding provisions of this Code if such walks are necessary, in their opinion, for safe and adequate pedestrian circulation.

SEC. 14-1-56 SANITARY SEWERAGE SYSTEM.

- (a) There shall be provided a sanitary sewerage system in conformity with the master plan of sewers as approved by the Village Board.
- (b) The subdivider shall make adequate sewage disposal systems available to each lot within the subdivision, certified survey map parcel or minor land division.
- (c) Subdivisions and certified survey map parcels shall be served by public sewer facilities. The size, type, and installation of all sanitary sewers proposed to be constructed shall be in accordance with plans and specifications approved by the Village.
- (d) The Village Board shall require the installation of sewer laterals to the street lot line.
- (e) The subdivider shall assume the cost of installing all sanitary sewers, eight (8) inches in diameter or less in size, including the bringing of the sanitary sewer from where it exists to the subdivision or minor land division in question, as well as providing all sanitary sewer work within the subdivision or minor land division. If greater than eight (8) inch diameter sewers are required to handle the contemplated sewage flows, the costs of such larger sewers shall be prorated in proportion to the ratio which the total area of the proposed subdivision or certified survey map is to the total drainage area to be served by such larger sewer and the excess cost either borne by the Village or assessed against the total tributary drainage area.
- (f) The subdivider shall install sanitary sewers in accordance with this Code and specification of the Village Engineer where it is determined that the proposed subdivision or minor land division lies within a public sanitary sewer service area and sanitary sewer facilities are programmed to be extended to the proposed subdivision or minor land division within six (6) years. Until such time as the public sewers within the subdivision or minor land division can be connected to the community public sewer system, they shall be temporarily capped. No private or public use shall be connected to the sewers within the subdivision or minor land division until such sewers are connected to the larger community system. The subdivider shall indicate on the face of the plat or certified survey map that the owner of private uses within the subdivision or minor land division shall connect such uses to the sewers in the subdivision or minor land division at the time such sewers are connected to the community sewer system, and that the Village be held harmless for any damages or costs incurred to disconnect and abandon any on-side sanitary sewer disposal system then in place and any costs associated with connection to the public sewer mains.

SEC. 14-1-57 WATER SUPPLY FACILITIES.

- (a) When public water supply and distribution facilities are available to the subdivision plat or minor land division or when it is proposed to establish a private water supply and distribution system to serve two (2) or more lots, the subdivider shall cause such water supply and distribution facilities to be installed in such a manner as to make adequate water service available to each lot within the subdivision or minor land division. The subdivider shall make provision for adequate private water

systems as required by the Village in accordance with the standards of the Wisconsin Department of Industry, Labor and Human Relations.

- (b) The Village Board may require the installation of water laterals to the street lot line.
- (c) The size, type and installation of all public water mains proposed to be constructed shall be in accordance with plans and standard specifications approved by the Village Board.
- (d) The subdivider shall assume the cost of installing all water mains, water laterals and water system appurtenances within the proposed subdivision or minor land division, except for the added cost of installing water mains greater than eight (8) inches in diameter.
- (e) The subdivider shall install water mains in accordance with this Code and specifications of the Village Engineer when it is determined that the proposed subdivision or minor land division lies within a public sanitary sewer service area and water main facilities are programmed to be extended to the proposed subdivision with six (6) years. Until such time as the public water mains within the subdivision or minor land division can be connected to the larger community water supply system, they shall be temporarily capped. No private or public use shall be connected to the water mains within the subdivision or minor land division until such water mains are connected to the larger community water supply system. The subdivider shall indicate on the face of the plat that connects such uses to the water mains within the subdivision or minor land division, and that the Village is held harmless for any damages or costs incurred to disconnect and abandon any on-site water supply system then in place and any costs associated with connection to the public water mains.

SEC. 14-1-58 STORM WATER DRAINAGE FACILITIES.

- (a) Pursuant to Section 14-1-73, the subdivider shall provide storm water drainage facilities adequate to serve the subdivision or minor land division which may include curb and gutter, catch basins and inlets, storm sewers, road ditches, open channels and water retention structures and settling basins, as may be required. Storm sewers are to be of adequate size and grade to hydraulically accommodate the ten (10) year storm; culverts shall be designed to accommodate the ten (10) year storm and shall be sized so that the twenty-five (25) year frequency storms do not cause flooding of the adjacent roadway. Upon the approval of the Village Engineer, storm water swales and ditches may be sized for from twenty-five (25) to one hundred (100) year frequency storms, depending upon the estimated amount of damage that would be incurred by adjacent properties if flooding did occur. Storm drainage facilities shall be so designed as to minimize hazards to life or property, and the size, type and installation of all storm water drains and sewers proposed to be constructed shall be in accordance with the plans and specifications approved by the Village Board, upon the recommendation of the Village Engineer. Storm sewers oversized to handle cost of oversizing such larger sewers shall be prorated in proportion to the ratio which the total area of the proposed subdivision or minor land division is to the borne by the Village or assessed against the total tributary drainage area.
- (b) Unpaved road ditches and street gutters may be permitted only within the Village's extraterritorial plat approved jurisdictional area and shall be shaped and seeded and/or sodded as grassed waterways. Where the velocity of flow is in excess of four (4) feet per second on soils having a severe or very severe erosion hazard and in excess of six (6) feet per second on soils having moderate, slight or very slight erosion hazard, the subdivider shall install a paved invert or check dams, flumes or other energy-dissipating devices.

- (c) Drainage facilities shall, if required, include water retention/detention structures and settling basins so as to prevent erosion and the sedimentation where such grades and installation of all storm water drains and sewers and other cross-section, invert and erosion control paving check dams, flumes or other energy-dissipating structures and seeding and/or sodding of open channels and unpaved road ditches proposed to be constructed shall be in accordance with the plans and standard specifications approved by the Village Engineer.

SEC. 14-1-59 OTHER UTILITIES

- (a) The subdivider shall cause gas, electrical power and telephone facilities to be installed in such a manner as to make adequate service available to each lot in the subdivision.
- (b) The subdivider shall cause gas, electric power and telephone facilities to be installed in such a manner as to make adequate service available to each lot in the subdivision, certified survey or land division. All new electrical distribution, television cables and telephone lines from which lots are individually served shall be underground unless the Village Board specifically allows overhead poles for the following reasons:
 - (1) Topography, soil, water table, solid rock, boulders, or other physical conditions would make underground installation unreasonable or impractical; or
 - (2) The lots to be served by said facilities can be served directly from existing overhead facilities.
- (c) Plans indicating the proposed location of all gas, electrical power and telephone distribution and transmission lines required to service the plat shall be approved by the Village Board and such map shall be filed with the Village Clerk-Treasurer.

SEC. 14-1-60 EROSION CONTROL

- (a) The subdivider shall cause all gradings, excavations, open cuts, side slopes, and other land surface disturbances to be mulched, seeded, sodded or otherwise protected so that erosion, siltation, sedimentation and washing are prevented. The subdivider shall submit an erosion control plan that specifies measures that will be taken to assure the minimization of erosion problems.
- (b) The Village Board may require the subdivider to provide or install certain protection and rehabilitation measures, such as fencing, sloping, seeding, riprap, revetments, jetties, clearing, dredging, snagging, drop structures, brush mats, willow poles and grade stabilization structures.
- (c) In wooded plats, tree cutting shall not exceed forty percent (40%) of the lot or tract and shall be so conducted as to prevent erosion and sedimentation, preserve and improve scenic qualities and, during foliation, substantially screen and development from stream or lake users.
- (d) Paths and trails in wooded and wetland areas shall not exceed ten (10) feet in width unless otherwise approved by the Plan Commission and shall be so designed and constructed as to result in the least removal and disruption of trees and shrubs and the minimum impairment of natural beauty.
- (e) Earth moving, such as grading, topsoil removal, mineral extraction, stream course changing, road cutting, waterway construction or enlargement, removal of stream or lake bed materials, excavation, channel, clearing, ditching, drain tile laying, dredging and lagooning, shall be so conducted as to minimize erosion and sedimentation.
- (f) Review of the conduct of such cutting, clearing and moving may be requested of the County Soil and Water Conservation District Supervisors, the State District Fish and Game Managers and the State District Forester by the Village Engineer or Plan Commission as they deem appropriate.

SEC. 14-1-61 PARTITION FENCES.

When the land included in a subdivision plat or certified survey map abuts upon or is adjacent to land used for farming or grazing purposes, the subdivider shall erect (at the request of the adjacent property owner), keep, and maintain (his portion under State law) partition fences, satisfying the requirements of the Wisconsin Statutes for a legal and sufficient fence, between such land and the adjacent land. A covenant binding the developer, its grantees, heirs, successors, and assigns to erect and maintain such fences, without cost to the adjoining property owners, so long as the land is used for farming or grazing purposes, shall be included upon the face of the Final Plat or certified survey map.

SEC. 14-1-62 EASEMENTS.

- (a) **Utility Easements.** The Village Board, on the recommendation of appropriate departments and agencies serving the Village, shall require utility easements for poles, wire, conduits, storm and sanitary sewers, gas, water and head mains or other utility lines. It is the intent of this Chapter to protect all established easements so as to assure proper grade, assure maintenance of the established grade, prohibit construction of permanent fences or retaining walls over underground installation and prevent the planting of trees in the easement area.
- (b) **Drainage Easements.** Where a subdivision is traversed by a watercourse, drainage way, channel or stream:
 - (1) There shall be provided a storm water easement or drainage right-of-way conforming substantially to the lines of such watercourse and such further width or construction, or both, as will be adequate for the purpose and as may be necessary to comply with this Section; or
 - (2) The watercourse, drainage way, channel or stream may be relocated in such a manner that the maintenance of adequate drainage will be assured and the same provided with a storm water easement or drainage right-of-way conforming to the lines of the relocated watercourse, and such further width or construction, or both as will be adequate for the purpose and may be necessary to comply with this Section.
 - (3) Wherever possible, it is desirable that drainage be maintained by an open channel with landscaped banks and adequate width for maximum potential volume flow. In all cases, such water course shall be of a minimum width established at the high-water mark or, in the absence of such specification, not less than thirty (30) feet. If, in the opinion of the Village Engineer, the easement will be for a major drainage swale, the easement shall be of sufficient width to contain a one hundred (100) year frequency storm. If the drainage easement is located in an established floodway or flood fringe district, the entire floodplain area shall be included within the drainage easement.
- (c) **Easement Locations.** Such easements shall be at least twelve (12) feet wide, or wider where recommended by the Village Engineer, and may run across lots or alongside of rear lot lines. Such easements should preferably be located along rear lot lines. Evidence shall be furnished the Plan Commission and Village Board that easements and any easement provisions to be incorporated in the plat or in deeds have been reviewed by the individual utility companies or the organization responsible for furnishing the serves involved.

SEC. 14-1-63 IMPROVEMENTS EXTENDED TO LIMIT OF PARCEL.

Any and all improvements or utility services required by this Chapter for the subdivision and/or minor land division of lands within the Village or within the Village's extraterritorial plat approval jurisdiction shall be extended to the farthest limit of the parcel or lot upon which a building permit is requested unless the owner is excused by the Village Board, the Plan Commission or Village utilities officials. In the event the improvements are required to the end of the parcel, as defined herein, the owner shall be required to post bond with the Village if improvements are not made.

SEC. 14-1-64 RECREATION, PARK, OR OPEN AREAS.

- (a) The Village shall require the developer to dedicate for parks, playgrounds and other open space purposes, a parcel of land equal to ten percent (10%) of the gross area of all property proposed for subdivision. Such parcel shall be shown and marked on the plat, "Dedicated for Park or Recreation Purposes".
- (b) The Village Board may require that lands dedicated for park, playgrounds, recreation, and open space purposed be of a character and location suitable for such use and purpose and may further require it to be relatively level and dry. All such parcels shall be reviewed and recommended by the Plan Commission, prior to Village Board approval.
- (c) Where a proposed park, playground, recreation or open space area is shown on the official map or master plan proposed subdivision, the Village Board shall require the dedication of such area within the subdivision. If the official map or master plan provides for an area in excess of the required ten percent (10%), the Board shall, before it takes final action on the plat, consider the official map or master plan and together with the appropriate board, determine if it should take necessary steps to acquire, through purchase, all or part of the park, playground, recreation or open space area as shown on the official map or master plan.
- (d) Where, with respect to a particular subdivision, the dedication of a parcel of land for parks, playgrounds, recreation or open space purposes does not comply with the official map or the master plan and as determined by the Plan Commission and the Village Board and dedication of such parcel would not be in the public interest, the Village shall require a payment of money in lieu of land. Such payment shall be equal to ten percent (10%) of the estimated fair market value of the gross land area proposed to be subdivided. The estimated fair market value shall be determined by the Village Assessor in the following manner: the assessed value of the property in question shall be divided by the assessment ratio of all taxable property for the same year as determined by the Department of Revenue.
- (e) The Village Board shall require that all payment in lieu of land be deposited with the Village Clerk. All such deposits shall be placed in a Park and Recreation Acquisition and Improvement Fund. The Village shall consider using such funds in a park that will benefit those persons making the contribution.

SEC. 14-1-65 THROUGH SEC. 14-1-69 RESERVED FOR FUTURE USE.

ARTICLE G

Design Standards

SEC. 14-1-70 GENERAL STREET DESIGN STANDARDS.

- (a) **Compliance with Statutes.** In laying out a subdivision, the owner shall conform to the provisions of Chapter 236, Wis. Stats., and all applicable Village regulations. In all cases where the requirements of this Chapter are different from the requirements of Chapter 236, the more restrictive provision shall apply.
- (b) **Dedication.** The subdivider shall dedicate land and improve streets as provided in this Chapter and Section 14-1-53. Streets shall be located with due regard for topographical conditions, natural features, existing and proposed streets, utilities and land uses and public convenience and safety. Streets shall conform to official maps adopted by the Village Board. The subdivision, certified survey parcel or land division shall be so designed as to provide each lot with satisfactory access to a public street or road.
- (c) **Compliance with Comprehensive Plan.** The arrangement, character, extent, width, grade and location of all streets shall conform to any Village Comprehensive Development Plan and to this Chapter and shall be considered in their relation to existing and planned streets, to reasonable circulation of traffic, to topographical conditions, to run-off of storm water, to public convenience and safety, and in their appropriate relation to the proposed uses of the land to be served by such streets. The arrangement of streets in new subdivisions shall make provision for the appropriate continuation at the same width of the existing streets in adjoining areas.
- (d) **Areas not Covered by Official Map.** In areas not covered by a Village Comprehensive Plan, the layout of streets shall conform to the plan for the most advantageous development of adjoining areas of the neighborhood. Streets shall be designed and located in relation to existing and officially planned streets, topography and natural terrain, streams and lakes and existing tree growth, public convenience and safety and in their appropriate relation to the proposed use of the land to be served by such streets.
- (e) **Street Classifications.** Streets shall be classified as indicated below.
 - (1) Arterial Streets. Arterial streets shall be arranged to provide through traffic for a heavy volume of vehicles.
 - (2) Collector Streets. Collector streets shall be arranged so as to provide ready collection of traffic from commercial and residential areas and conveyance of this traffic to the major street and highway system and shall be properly related to special traffic generators such as schools, churches and shopping centers and other concentrations of population and to the major streets into which they feed.
 - (3) Minor Streets. Minor streets shall be arranged to conform to the topography, to discourage use by through traffic, to permit the design of efficient storm and sanitary sewerage systems and to require the minimum street area necessary to provide safe and convenient access to abutting property.
 - (4) Proposed Streets. Proposed streets shall extend to the boundary lines of the tract being subdivided unless prevented by topography or other physical conditions or unless, in the opinion of the Village Board, such extension is not necessary or desirable for the coordination of the layout of the subdivision or land division or for the advantageous development of the adjacent tracts.

- (f) **Reserve Strips.** Reserve strips shall not be provided on any plat to control access to streets or alleys, except where control of such strips is placed with the Village under conditions approved by the Village Board.
- (g) **Alleys.**
 - (1) Commercial and Industrial. Alleys shall be provided in all commercial and industrial districts for off-street loading and service access, except that the Village Board may waive this requirements where other definite and assured provisions is made for service access, such as off-street loading and parking, consistent with and adequate for the uses proposed.
 - (2) Residential. Alleys shall not be approved in residential areas unless necessary because of topography and other exceptional circumstances.
 - (3) Width. The width of alleys shall not be less than twenty-four (24) feet.
 - (4) Dead End. Dead end alleys are prohibited and crooked and "T" alleys shall be discouraged.
- (h) **Continuation.** Streets shall be laid out to provide for possible continuation wherever topographic and other physical conditions permit. Provision shall be made so that all proposed streets shall have a direct connect with, or be continuous and in line with, existing, planned or platted streets with which they are to connect. Proposed streets shall be extended to the boundary lines of the tract to be subdivided, unless prevented by topography or other physical conditions, or unless in the opinion of the Village Board, upon the recommendation of the Plan Commission, such extension is not necessary or desirable for the coordination of the layout of the subdivision with existing layout or the most advantageous future development of adjacent tracts. Dead end streets not over five hundred (500) feet in length will be approved when necessitated by the topography.
- (i) **Minor Streets.** Minor streets shall be so laid out so as to discourage their use by through traffic.
- (j) **Number of Intersections.** The number of intersections of minor streets with major streets shall be reduced to the practical minimum consistent with circulation needs and safety requirements, preferably not more than two (2).
- (k) **Frontage Roads.** Where a subdivision abuts or contains an existing or proposed arterial highway, the Village Board may require a frontage road, no access reservation along the rear of the property contiguous to such highway or such other treatment as may be necessary to ensure safe, efficient traffic flow and adequate protection of residential properties.
- (l) **Private Streets.** Private streets shall not be approved nor shall public improvements be approved for any private street; all streets shall be dedicated for public use.
- (m) **Visibility.** Streets shall afford maximum visibility and safety and shall intersect at right angles where practicable. As required by the Village Engineer, sufficient vision clearance triangles shall be provided at intersections.
- (n) **Tangents.** A tangent at least one hundred (100) feet long shall be required between reverse curves on arterial and collector streets.
- (o) **Street Grades.**
 - (1) Unless necessitated by exceptional topography subject to the approval of the Village Board, the maximum centerline grade of any street or public way shall not exceed the following:
 - Arterial streets: six percent (6%).
 - Collector streets: seven percent (7%).
 - Minor streets, alleys and frontage streets: ten percent (10%).
 - Pedestrian ways: twelve percent (12%) unless steps of acceptable design are provided.
 - The grade of any street shall in no case exceed twelve percent (12%) or be less than one-half (1/2) of one percent (1%).
 - (2) Street grades shall be established wherever practicable so as to avoid excessive grading, the promiscuous removal of ground cover and tree growth, and general leveling of the topography.

- (p) **Radii of Curvature.** When a continuous street centerline deflects at any one (1) point by more than ten (10) degrees, a circular curve shall be introduced having a radius of curvature on said centerline of not less than the following:
Arterial streets and highways: five hundred (500) feet.
Collector streets: three hundred (300) feet.
Minor streets: one hundred (100) feet.
- (q) **Half Streets.** Where an existing dedicated or platted half-street is adjacent to the subdivision, the other half-street shall be dedicated by the subdivider. The platting of half-streets should be avoided where possible.
- (r) **Intersections.**
- (1) Property lines at street intersections of major thoroughfares shall be rounded with a radius of fifteen (15) feet or of a greater radius where the Village Engineer considers it necessary.
 - (2) Streets shall intersect each other at as nearly right angles as topography and other limiting factors of good design permit.
 - (3) Number of streets converging at one (1) intersection shall be reduced to a minimum, preferably not more than two (2).
- (s) **Street Names.** New street names shall not duplicate the names of existing streets, but streets that are continuations of others already in existence and named shall bear the names of the existing streets. Street names shall be subject to approval by the Village Board.
- (t) **Cul-de-sacs.**
- (1) Cul-de-sacs. Cul-de-sac streets designed to have one (1) end permanently closed shall not exceed five hundred (500) feet in length. All cul-de-sac streets designed to have one (1) end permanently closed shall terminate with a turnaround of not less than one hundred thirty (13) feet in diameter of right-of-way and a roadway of not less than one hundred (100) feet in diameter. The use of cul-de-sacs should be avoided where possible.
 - (2) Temporary Termination of Streets. Temporary termination of streets intended to be extended at a later date shall be accomplished with a temporary cul-de-sac in accordance with the standards set forth above, or by the construction of a temporary "T" intersection thirty-three (33) feet in width and thirty-three (33) feet in length abutting the right-of-way lines of the access street on each side.
- (u) **Limited Access Highway and Railroad Right-of-way Treatment.** Whenever the proposed subdivision contains or is adjacent to a limited access highway, arterial street or railroad right-of-way, the design shall provide the following treatment:
- (1) Subdivision Lots. When lots within the proposed subdivision back upon the right-of-way of an existing or proposed limited access highway or a railroad, a planting strip at least thirty (30) feet in depth shall be provided adjacent to the highway or railroad in addition to the normal lot depth. This strip shall be part of the platted lots but shall have the following restriction lettered on the face of the plat: "This strip reserved for the planting of trees and shrubs; the building of structures hereon prohibited".
 - (2) Commercial and Industrial Districts. Commercial and industrial properties shall have provided, on each side of the limited access highway, arterial street or railroad, streets approximately parallel to and at a suitable distance from such highway or railroad for the appropriate use of the land between such streets and highway or railroad, but not less than one hundred fifty (150) feet.
 - (3) Streets Parallel to a Limited Access Highway. Streets parallel to a limited access highway or railroad right-of-way, when intersecting a major street and highway or collector street which crosses said railroad or highway, shall be located at a minimum distance of two hundred fifty (250) feet from said highway or railroad right-of-way. Such distance, where desirable and

practicable, shall be determined with due consideration of the minimum distance required for the future separation of grades by means of appropriate approach gradients.

- (4) **Minor Streets.** Minor streets immediately adjacent and parallel to railroad rights-of-way shall be avoided, and location of minor streets immediately adjacent to arterial streets and highways and to railroad rights-of-way shall be avoided in residential areas.
- (v) **Width.** The right-of-way of all streets shall be of the width specified on the official map or master plan or, if no width is specified there, they shall be not less than the width specified below:

<u>Street Type</u>	<u>Right-of-Way Minimum Width</u>	<u>Roadway (Curb Face to Curb Face)</u>
Collector (carries traffic from minor streets to arterials or highways)	66 feet	40 feet
Minor (provides access to individual lots)	60 feet	37 feet
Half street	One-half total right-of-way of proposed street	
Cul-de-sac	60 feet	37 feet
Alleys: Residential	24 feet	20 feet
commercial or industrial	32 feet	30 feet

- (w) **Construction Standards.** All streets and highways constructed in the Village or to be dedicated to the Village shall fully comply with the following construction standards:

(1) **Roadway Base Thickness.**

- Residential streets shall have a minimum roadway base thickness of eight (8) inches of compacted in-place crushed aggregate base course of gradation No. 2 in the top layer and gradations No. 1 and No. 2 in the lower level.
- On commercial, arterial or other heavy-use streets, as determined by the Village Board, a base course of eight (8) inches compacted gravel shall be constructed upon an inspected and approved subgrade, either well-crushed gravel from a state-approved pit with a maximum stone of one and one-half (1 1/2) inches and no greater than ten percent (10%) by weight passing a No. 200 sieve or No. 3 crushed rock approximately six (6) inches in depth and one (1) or more layers of fine aggregate either three-fourths (3/4) inch crushed gravel, well-graded with no greater than ten percent (10%) passing a No. 200 sieve, or three-fourths (3/4) inch traffic-bound crushed rock.
- In the case of commercial, arterial or other heavy-use roads, the Village Board may, in the alternative to the above standards, have the Village Engineer provide specifications for such roads after researching the site(s) and conducting a soil analysis.
- In any case, the Village Board shall have the sole discretion in determining the use and construction classification to be adhered to.

- e. In all cases, the base course shall be compacted to the extent necessary to produce a condition so that there will be no appreciable displacement of material laterally and longitudinally under traffic and shall conform to line, grades and shape shown on the approved plans, profiles and cross-sections.
 2. **Roadway Sub-Base.** Stable and nonorganic material required. Unstable and organic material must be sub-cut, removed and replaced with a suitable granular or breaker-run material approved by the Village Engineer.
 3. **Pavement Thickness.** Residential streets shall have a minimum of two and one-half (2 1/2) inches thick compacted bituminous concrete pavement, placed in two (2) layers –a binder course of one and one-half (1 1/2) inches thick and a surface course of one (1) inch. On commercial, arterial or other heavy use streets, there shall be a minimum of three and one-half (3 1/2) inches of bituminous concrete pavement, placed in two (2) layers –a binder course of two (2) inches thick and a surface course of one and one-half (1 1/2) inches thick. In the case of commercial, arterial or other heavy use roads, the Village Board may, in the alternative to the above standards, have the Village Engineer provide specifications for paving such roads after researching the site(s) and conducting a soil analysis. In any case, the Village Board shall have the sole discretion in determining the use and construction classification to be adhered to.
- (x) **New and Replacement Bridges and Culverts.** All new and replacement bridges and culverts over perennial waterways, including pedestrian and other minor bridges, in addition to meeting other applicable requirements, shall be designed so as to accommodate the one hundred (100) year recurrence interval flood event without raising the peak stage, either upstream or downstream, more than one one-hundredth (0.01) feet above the peak stage for the one hundred (100) year recurrence interval flood, as established in the applicable federal flood insurance study. Larger permissible flood stage increases may be acceptable for reaches having topographic land use conditions which could accommodate the increased stage without creating additional flood damage potential upstream or downstream of the proposed structure. Such bridges and culverts shall be so designed and constructed as to facilitate the pass of ice flows and other debris. All new and replacement bridges shall be constructed in accordance with all applicable State Statutes and codes and shall be submitted to the Department of Natural Resources to assure compliance therewith.

SEC. 14-1-71 BLOCK DESIGN STANDARDS.

- (a) **Length; Arrangement.** The lengths, widths and shapes of blocks shall be appropriate for the topography and the type of development contemplated, but block length in residential areas shall not exceed one thousand five hundred (1,500) feet nor have less than sufficient width to provide for two (2) tiers of lots of appropriate depth between street lines. As a general rule, blocks shall not be less than three hundred (300) feet in length.
- (b) **Pedestrian Pathways.** Pedestrian pathways, not less than ten (10) feet wide, may be required by the Village Board, upon the recommendation of the Plan Commission, through the center of a block more than nine hundred (900) feet long, where deemed essential to provide circulation or access to schools, parks, churches, playgrounds, shopping centers, transportation and other community facilities.
- (c) **Width.** The width of blocks shall be wide enough to provide for two (2) tiers of lots of appropriate depth except where otherwise required to separate residential development from through traffic. Width of lots or parcels reserved or laid out for commercial or industrial use shall be adequate to provide for off-street service and parking required by the use contemplated and the area zoning restrictions for such use.

- (d) **Utility Easements.** Utility easements for electric power and telephone service shall, where practical, be placed on midblock easements along rear lot lines.

SEC. 14-1-72 LOT DESIGN STANDARDS.

- (a) **Size.** The size, shape and orientation of lots shall be appropriate for the location of topography of the subdivision, the type of sewerage or septic system to be utilized, and for the type of development contemplated, provided that no lot shall be smaller in area than the minimum lot size for the appropriate zone as established by the Zoning Code.
- (b) **Commercial Lots.** Depth and width of properties reserved or laid out for commercial or industrial purposes shall be adequate to provide for the off-street service and parking facilities required by the type of use and development contemplated, as required by the Zoning Code.
- (c) **Lots Were Abutting Major Highway.** Residential lots fronting on major streets and highways shall be planted with extra depth or design or alleviate the effect of major street traffic on residential occupancy.
- (d) **Corner Lots.** Corner lots for residential use shall have extra width of ten (10) feet to permit full building setback from both streets.
- (e) **Access to Public Streets.** Every lot shall front or abut for a minimum distance of at least forty (40) feet on a public street. Lots with an access only to private drives or streets shall be permitted only with Village Board approval.
- (f) **Side Lots.** Side lot lines shall be substantially at right angles
- (g) **Double and Reversed Frontage Lots.** Double frontage and reversed frontage lots shall be avoided except where necessary to provide separation of residential development from traffic arteries or to overcome specific disadvantages of topography and orientation.
- (h) **Natural Features.** In the subdividing of any land, regard shall be shown for all natural features, such as tree growth, water courses, historic spots or similar conditions which, if preserved, will add attractiveness and stability to the proposed development.
- (i) **Land Remnants.** All remnants of lots below minimum size left over after subdividing of a larger tract must be added to adjacent lots, or a plan shown as to future use rather than allowed to remain as unusable parcels.
- (j) **Large Lots.** Where lots are created of a size larger than normal for the area, the Plan Commission may require that the plat be so designed as to allow for the possible future re-subdivision of such lots into normal sizes compatible with the area.
- (k) **Lot Area and Dimensions.** Area and dimensions of all lots shall conform to the requirements of the Village of Milltown Zoning Code for the subdivisions within the Village and to the applicable county zoning ordinance within the Village's extraterritorial jurisdictional limits.
- (l) **Lot Depth.** Depth of lots shall be a minimum of one hundred (100) feet. Excessive depth in relation to width shall be avoided and a proportion of one and one-half to one (1 1/2:1) shall be considered a desirable ration under normal conditions. Depth of lots of parcels reserved or laid out for commercial or industrial use shall be adequate to provide for off street service and parking required by the use contemplated.
- (m) **Lot Width.** Width of lots shall conform to the requirements of the Village Zoning Code, or other applicable ordinance, and in no case shall a lot be less than sixty (60) feet in width at the building setback line.

SEC. 14-1-73 DRAINAGE SYSTEM.

- (a) **Drainage System Required.** As required by Section 14-1-56, a drainage system shall be designed and constructed by the subdivider to provide for the proper drainage of the surface water of the subdivision and the drainage area of which it is a part of. A Final Plat shall not be approved until the subdivider shall submit plans, provides and specifications as specified in this Section, which have been prepared by a registered professional engineer and approved by the Village Board, upon the recommendations of the Plan Commission and Village Engineer.
- (b) **Drainage System Plans.**
- (1) The subdivider shall submit to the Village at the time of filing a Preliminary Plat a preliminary drainage plan or engineering report on the ability of existing watercourse channels, storm sewers, culverts and other improvements pertaining to drainage or flood control within the subdivision to handle the additional runoff which would be generated by the development of the land within the subdivision. Additional information shall be submitted to adequately indicate that provision has been made for disposal of surface water without any damage to the developed or undeveloped land downstream or below the proposed subdivision. The report shall also include:
 - a. Estimates of the quantity of storm water entering the subdivision naturally from areas outside the subdivision.
 - b. Quantities of flow at each inlet or culvert.
 - c. Location, sizes and grades of required culverts, storm drainage sewers and other required appurtenances.
 - (2) A grading plan for the streets, blocks and lots shall be submitted by the subdivider for the area within the subdivision.
 - (3) The design criteria for storm drainage systems shall be based upon information provided by the Village Engineer.
 - (4) Material and construction specifications for all drainage projects (i.e., pipe, culverts, seed, sod, etc.) shall be in compliance with specifications provided by the Village Engineer.
- (c) **Grading.** The subdivider shall grade each subdivision in order to establish street, block and lot grades in proper relation to each other and to topography as follows:
- (1) The subdivider shall grade the full width of the right-of-way of all proposed streets in accordance with the approved plans.
 - (2) Block grading shall be completed by one (1) or more of the following methods:
 - a. A ridge may be constructed along the rear lot lines which provides for drainage onto the streets.
 - b. Parts of all lots may be graded to provide for drainage to the street or to a ditch along the rear lot line.
 - c. Draining across rear or side lot lines may be permitted provided that drainage onto adjoining properties is skillfully controlled.
- (d) **Drainage System Requirements.** The subdivider shall install all the storm drainage facilities indicated on the plans required in Subsection (a) of this Section.
- (1) Street Drainage. All streets shall be provided with an adequate storm drainage system. The street storm system shall serve as the primary drainage system and shall be designed to carry street, adjacent land and building storm water drainage. No storm water shall be permitted to be run into the sanitary sewer system within the proposed subdivision.
 - (2) Off-Street Drainage. The design of the off-street drainage system shall include the watershed affecting the subdivision and shall be extended to a watercourse or ditch adequate to receive

the storm drainage. When the drainage system is outside of the street right-of-way, the subdivider shall make provisions for dedicating an easement to the Village to provide for the future maintenance of said system. Easements shall be a minimum, of twenty (20) feet, but the Village may require larger easements if more area is needed due to topography, size of watercourse, etc.

- (e) **Protection of Drainage Systems.** The subdivider shall adequately protect all ditches to the satisfaction of the Village Board and Village Engineer. Ditches and open channels shall be seeded, sodded or paved depending upon grades and soil types. (Generally, ditches or channels with grades up to one percent [1%] shall be seeded; those with grades up to four percent [4%] shall be sodded and those with grades over four percent [4%] shall be paved).

SEC. 14-1-74 NON-RESIDENTIAL SUBDIVISIONS.

(a) **General.**

- (1) If a proposed subdivision includes land that is zoned for commercial or industrial purposes, the layout of the subdivision with respect to such land shall make such provisions as the Village may require.
- (2) A non-residential subdivision shall also be subject to all the requirements of site plan approval set forth in the Village Zoning and Building Codes. A non-residential subdivision shall be subject to all the requirements of this Chapter, as well as such additional standards required by the Village and shall conform to the proposed land use standards established by any Village Comprehensive Plan or Official Map and the Village Zoning Code.

(b) **Standards.** In addition to the principles and standards in this Chapter, which are appropriate to the planning of all subdivisions, the applicant shall demonstrate to the satisfaction of the Village Board that the street, parcel and block pattern proposed is specifically adapted to the uses anticipated and takes into account other uses in the vicinity. The following principles and standards shall be observed:

- (1) Proposed industrial parcels shall be suitable in area and dimensions to the types of industrial development anticipated.
- (2) Street rights-of-way and pavement shall be adequate to accommodate the type and volume of traffic anticipated to be generated thereupon.
- (3) Special requirements may be imposed by the Village Board with respect to street, curb, gutter and sidewalk design and construction.
- (4) Special requirements may be imposed by the Village Board with respect to the installation of public utilities, including water, sewer and storm water drainage.
- (5) Every effort shall be made to protect adjacent residential areas from potential nuisance from a proposed commercial or industrial subdivision, including the provision of extra depth in parcels backing up on existing or potential residential development and provisions for permanently landscaped buffer strips when necessary.
- (6) Streets carrying non-residential traffic, especially truck traffic, shall not normally be extended to the boundaries of adjacent existing or potential residential areas.

**SEC. 14-1-75 AUTHORIZING STREET ACCESS OF LESS THAN 60 FEET TO THE PLATS
OF HASTA LA VISTA, GANDY VIEW ESTATES AND UPTOWN
